Subject: Industrial Energy Extension Program Quarterly Progress Summary Report for EES/GIT Research Project A-2614 for Period, 1 April, 1980 through 30 June, 1980

Dear Mr. Bistany:

This summarizes activities on Research Project A-2614 for the second quarter of 1980.

Program Goals for the Quarter

1. Continue technical assistance program and industrial energy audits as requested.

2. Develop and document case studies and special reports on specific technology areas as scheduled.

3. Conduct the following workshops:
   - Waste Heat Recovery, Atlanta, April 3.
   - Industrial Energy Conservation, Macon, April 22.
   - Stone, Clay, and Glass Industry, Atlanta, May 22.

4. Print and mail May issue of the Conserver.

5. Continue work on computer programs for use in evaluating industrial energy conservation measures.

6. Coordinate efforts of ARC energy conservation project with LEES.

7. Continue program promotion.

8. Continue program evaluation.
Accomplishments for the Quarter

1. Statistics for in-plant work by industrial groups:

</tr>
</tbody>
</table>

2. Workshop Statistics:
   A. As per Table 1 attached
   B. Continued planning and preparation for remaining workshops.

3. May issue of Conserver mailed to approximately 6000 industries.

4. Coordinated tasks of ARC energy conservation project with IEES.

6. IEES engineers were involved in various presentations of results and promotional efforts including:
   - Two papers presented at Second Annual Conference on Industrial Energy Conservation Technology and Exhibition, Houston, Texas, in April.
   - One article written for Energy Management column of Textile World Magazine.
   - IEES presentations made to the Rotary Club of Calhoun, Georgia and the IEEE Subchapter in Warner Robins, Georgia.
   - Article on IEES published in magazine of Georgia Society of Professional Engineers.
7. Implemented use of new workshop evaluation forms and procedures recommended in 1st Quarter meeting with you, DOE regional representatives and Price Waterhouse representatives. Will continue improvement of technology transfer evaluation over the next two quarters.

8. Personnel Changes (see attached manpower chart)

- Carol Aton is new Technology Transfer Coordinator replacing Bill Moran as Acting Coordinator
- David Brookstein has left Georgia Tech. Rachel Moore replaces him as Textiles Coordinator. Chuck Carr of the Textile Engineering Department has been added in a staff position in the Textiles Sector.
- Gary Richardson will be leaving Georgia Tech, effective August 1. Norris Garmon will replace him as General Industry Coordinator.

Milestones Met During The Quarter

1. Evaluated results of TEES program through the second quarter of 1980 (see attachment). Actual energy savings by Georgia industries added to the second quarter, 1980, was $5.59 \times 10^{12}$ BTU. This gives a cumulative total program savings of $46.7 \times 10^{12}$ BTU and $128.1$ million (cumulative goal to date is $42.5 \times 10^{12}$ BTU).

2. Presented three workshops and sent 22 reports to industry.

Major Activities

The major emphasis during this quarter was in three areas:

- Workshops and technology transfer
- In-plant technical assistance and energy audits
- Follow-up and evaluation of program results.

Program interest continues to remain at a high level. We are experiencing the continued high rate of unsolicited requests for our services that has kept us in a backlog position for over a year now. Inflation is taking its toll on our program manpower which is making it
very difficult, if not impossible, to maintain program efforts at their present level. Program results to date continue to remain above established goals and we fully expect to surpass our 1980 goal.

Respectfully submitted,

Walter A. Hendrix
Program Coordinator

William G. Moran
Program Director

Quarterly Progress Summary Report  
for EES/GIT Research Project A-2614  
for Period, 1 July, 1980 through  
30 September, 1980  

Dear Mr. Bistany:  

This summarizes activities on Research Project A-2614 for the third quarter of 1980.  

Program Goals for the Quarter  

1. Continue energy audit and technical assistance program for industry.  
2. Develop and document case studies and special reports on specific technology areas as scheduled.  
3. Conduct the following workshops:  
   - Textile Industry, Atlanta, August 5  
   - Boiler Efficiency, Macon, August 19  
   - Chemical Industry, Savannah, September 18-19  
   - Industrial Energy Conservation, Atlanta, September 23  
4. Print and mail July issue of the Conserver.  
5. Continue work on computer programs for use in evaluating industrial energy conservation measures.  
6. Coordinate efforts of ARC energy conservation project with IEES.  
7. Continue program promotion.  
8. Continue program follow-up and evaluation.

Industry contacts for the Food Group and the General Group are relatively low this quarter due to the fact that there was a transition period for personnel assigned as new coordinators in these areas.

2. Workshop Statistics:

A. As per Table 1 attached
B. Continued planning and preparation for remaining workshops.

3. July issue of Conserver mailed to approximately 6000 industries.

4. Coordinated tasks of ARC energy conservation project with IEES.

6. IEES engineers were involved in various presentations of results and promotional efforts including:

- Two energy tips published in *Chemical Engineering Magazine*, July 28 and September 22.
IEES presentation made to the DeKalb County Jaycees.

Article in preparation concerning IEES work in the food industry to be published in Processed Prepared Foods.

7. Computer program for analyzing dryers and kilns completed.

8. Personnel Changes:

- Danny Reed has left Georgia Tech. Hank Jackson has replaced him as Food Industry Coordinator.
- Gary Richardson has left Georgia Tech. Norris Garmon has replaced him as General Industry Coordinator.
- Bill Moran has left Georgia Tech. Bo Hendrix has assumed all of his IEES administrative duties.

9. Continued implementation of the Price Waterhouse program evaluation method. Since this method is extremely difficult to implement and so far has yielded poor results, an attempt will be made to devise more effective evaluation procedures.

10. Special Reports

Food Industry: "Waste Heat Recovery from Refrigeration"
General Industry: "Energy Efficient Process Heating"
Stone, Clay and Glass Industry: "Efficient Operation of Rotary Kilns and Dryers"
Textile Industry: "New Innovations in Energy Conservation for the Textile Industry"
Chemical Industry: "Drying Wood Residues"

"Energy Conservation for Pulp and Paper Recausticizing"
"Energy Management and Computers in the Pulp and Paper Industry"

Milestones Met During the Quarter

1. Evaluated results of IEES program through the third quarter of 1980 (see attachment). Estimated program energy savings by Georgia industries for the third quarter of 1980 was $10.42 \times 10^{12}$ BTU. This gives a cumulative total program savings of $57.2 \times 10^{12}$ BTU and $162.6$ million. The cumulative energy savings goal to date is $55.6 \times 10^{12}$ BTU.

2. Presented four workshops and completed 10 audits and 11 TA's.
Major Activities

The major emphasis during this quarter continued in the following three areas:

- Workshops and other technology transfer
- In-plant technical assistance and energy audits
- Follow-up and evaluation of program results.

More effort will be placed into program evaluation this quarter. It is hoped that the results derived from this emphasis will not only validate our savings to date, but also provide some direction in the planning of next year's program. A planning document for the 1981 program will be prepared and delivered to you for comments and approval before the end of the quarter.

Respectfully submitted,

Walter A. Hendy

2. Workshop statistics as per Table 1 attached.

3. November and December issues of Conserver mailed to approximately 6000 industries.

4. Coordinated tasks of ARC energy conservation project with IEES.

5. IEES engineers were involved in various presentations of results and promotional efforts including:
   - IEES Program was featured in article in November issue of Processed Prepared Foods.
   - One article written for Textile World magazine.
   - One Energy Tip published in November 17 issue of Chemical Engineering magazine.
   - Presentation on IEES program made to Atlanta Gas Light employees at their annual energy conservation update seminar.

7. Cancelled Food Industry Workshop due to lack of response.

Milestones Met During the Quarter

1. Evaluated results of IEES program through the fourth quarter of 1980 (see attachment). Estimated program energy savings by Georgia industries for the fourth quarter of 1980 was in excess of $14.88 \times 10^{12}$ BTU. This gives a cumulative total program savings in excess of $72.1 \times 10^{12}$ BTU for a cost savings of $211.5$ million. The cumulative energy savings goal to date is $72.5 \times 10^{12}$ BTU.

2. Completed six audits, three TA's and 1 special report.

Major Activities

The major emphasis during this quarter continued in the following three areas:

- Workshops and other technology transfer
- In-plant technical assistance and energy audits
- Follow-up and evaluation of program results.

Special emphasis was placed on program evaluation this quarter in order to validate our savings to date and also provide some direction in the planning of next year's program. A planning document for the 1981 program was prepared and delivered to you for comments and approval before the end of the quarter.

Respectfully submitted,

Walter A. Hendrix
Program Coordinator

1Adjusted SIC Companies column excludes plants which have received IEES in-plant audits or technical assists.

2Convention adopted here is: No. of plants represented / No. of plants contacted by phone for survey.

Total Workshop Attendance = 34

The data gathered during this survey indicates that participating firms have saved significantly more energy than the non-participating firms. Participants are also more willing to share ideas about conservation. Surveyors reported that non-participating firms were not very cooperative. This unwillingness to divulge information undoubtedly reduced the estimate of their energy savings, although it is impossible to determine the extent of that reduction.
