The Largest and the Smallest

Look carefully at any direct-current electric motor and you will see the "armature," which spins around inside the "field" and converts the electric current into power.

The girl holds a little armature. Behind it is the largest single unit we have built, for a direct-current motor of 4500 horse power for use in Detroit to help make automobiles.

GENERAL ELECTRIC
Speak Out, Alumni

There is no denying the fact that the gold of silence has its virtues but too much concealment, "like a worm in the bud," may feed on your psychological makeup to such an extent that the brightest gold can become the dullest dross.

With the year 1885 on its seal, Georgia Tech is comparatively a young institution, yet it has at least reached its majority and if its activities are not keeping pace with those of all other institutions then we should hear from the "vox alumni" in a direct way.

We believe constructive criticism a fine builder and we also know that you can "easily teach twenty what were good to do" than to be one of the twenty to follow your own instruction; yet, if there were no teachers there would be but little advancement, so if everything at Tech has not reached its stride or if certain things have gone in leaps and bounds with a loss of perspective, then voice your opinions through the medium of your alumni association, its publication or otherwise, keeping it all in the family, if necessary, while the construction is in progress.

You are very fortunate to have Dr. Brittain as President of the Institution and he is carrying forward a great work in fine style. The scholarship of the school is of the very highest standard and its activities are all on a clean, ideal basis. It has a prestige, deserved but earned, which you as an alumnus, no doubt, realize daily; your president is the right man in the right place.

In the course of events, you have had a whole lot to do with the development of which you are a very important part; if it were not for you, your interest, support and effort, there would be little or no progress; so, we feel that every one connected with the school has every consideration and respect for you; if there is any one that has not, then he is the wrong man in the wrong place and you can remedy the situation by speaking out.

In the October issue of the Alumnus we published the action taken by the executive board of the Alumni Association, in reference to the ticket arrangement for the various athletic events; this was done in co-operation with the Georgia Tech Athletic Association and, no doubt, meets with your hearty approval, as we have had no information from any of you to the contrary. It will be up to you to follow through. Mr. L. W. Robert, Jr., and Mr. Geo. W. McCarty, Jr., your president, are the two alumni members of the athletic board. If you think the alumni should have a representation on this board equal to the other bodies then let us hear from you. (Cont'd next Page)
You have a fine coaching staff, four members of whom are alumni and the head of whom is an alumnus nationally known and respected, Coach Alexander. If you think the schedule committee is driving his team too hard, say so; although Tech doesn't hesitate to take on the best in the land, win or lose, and stays close to the top always and on the top not infrequently.

Should we need a graduate manager in athletics to work with the faculty managers, officers, and committees, then voice your opinion on the subject and recommend one with a thorough knowledge of the alumni, of likable personality, with a diplomatic turn and possessed with sound business ability. Nobody in your alumni office will fill those requirements, even if lack of many jobs and time would permit—so there never will be any applications or considerations from that source.

Also, we think that Georgia Tech has given the United States some of its most prominent men in every phase of professional and business life; then, too, educators are with us and have left us who rank among the highest in their great profession—have any of these had any honorary degree conferred upon them by the school? We understand that Tech has recently been empowered to recognize the able men of the country—graduates or non-graduates. Certainly many of the graduates have more than earned their full degrees, though perhaps reluctant to apply for that which is justly theirs. What is your thought in the case?

What would you suggest in the matter of securing appropriations from the State, scholarship, endowments, and the like?

Let us hear from you—unless you think everything is “sitting pretty” for the present; and, to close with a very important anti-climax:

Sneak out for your Home Coming reservations right away. Use the notice elsewhere shown in this issue and also.

Speak out on your 1925-26 dues, if you haven’t already done so. Why let us and the faithful 20% carry your responsibility any longer? We are for every one of you and if you are being somewhat slowed up on the grade, our publication and services will even more readily be at your command and that with every good wish for your immediate and everlasting success.

City and State
First Hand Information on the "Beginning of Georgia Tech"

It is with much pleasure that we publish this very enlightening letter concerning our history on which all of us should be correctly informed.

Due to the fact that it reached our office just as The Tech Alumnus was going to press we decided to publish it first and ask the author later. The letter is a fine type of that constructive information we are requesting. Mr. Whitney, M.E., '92, will be in Atlanta on Home Coming Day. Don't fail to meet him.

Philadelphia, Penna.,
October 27, 1925.

Mr. R. J. Thiesen, Editor,
Georgia Tech Alumnus,
Atlanta, Ga.

Dear Sir:—

Apropos of the coming Tech-Georgia football game, I am reminded of a letter which I partially completed to you after reading the November, 1924, issue of the Georgia Tech Alumnus. I laid the letter aside, however, and have just recently uncovered it.

Referring to the November, 1924, issue, my attention was called in particular to Dr. Brittain's article entitled, "The Beginning of Georgia Tech." My first impression was with the fact that some one did not furnish the Doctor with authentic information as, doubtless, was noticed by the few remaining alumni who were in attendance during the first year of Tech history.

Being one of the gallant 130 who enrolled in 1888, the cut shown of the First Faculty has a familiar look, but is misnamed, for the reason that of the nine men in the photograph, only six were of the First Faculty when the institution started, viz.: Dr. I. S. Hopkins, President and Chair of Physics; Captain Lyman Hall, Mathematics; Dr. J. S. Coon ("Uncle Si"), Mechanics and Mechanical Drawing; Dr. W. H. Emerson, Chemistry; Mr. Milton P. Higgins, Superintendent of Shop; Mr. Chas. Lane, English.

The other three worthy gentlemen, Mr. D. B. Oviatt, Mr. Frank Spain, and one, whose name I do not recall, joined the forces about two years later.

At that date football had not been started at Tech, although Tech's baseball team had no mean rating.

Professor Frank Spain, standing back of Captain Hall, was one of the pioneers in Tech football and played on the team in 1893, when Dr. Leonard Wood came over from Fort McPherson and enrolled as a student and gave Tech students their first instruction in the game.

Evidently, some one also told Dr. Brittain that the picture of the Campus in 1888 showed three buildings. There were only two buildings until the spring of 1889, when a small frame building of great notoriety was erected in the hollow, at the rear and between the two brick buildings shown in the photograph, which had a history of its own. Ask any man up to Class '95.

Now, while speaking of beginnings, it will doubtless be of interest to many to know of the origin of the Tech colors and the famous Techity Rex Yell. After the opening of the institution at least two years had passed and no colors had been selected, although several of the classes had organized, elected officers and selected their individual colors. Class 1892, of which the writer was a member, selected White, Gold and Blue and had class pins made up in the shape of a GST monogram and the above colors filled in, in enamel.

In the fall of 1891 football was just being started as a major sport in Southern Colleges and up to that time other than one or two individually owned balls kicked over the slope in front of the main buildings, Tech did not know the first rudiments of football.

Around Thanksgiving time of that
year a game had been scheduled between the University of Georgia and Auburn, and as a result of some of the feeling developed in previous baseball games, Tech students had been invited to attend the game and root for Auburn. The invitation was referred to the Officers of the Senior Class, then Class of '92, and the President of the Class called a mass meeting and it was voted that the students attend in a body. A committee was appointed to submit colors to be worn and yells to be used for the occasion. This committee was composed of: A. R. Colcord, Arthur Solomon, the writer, and one or two others, whose names have passed out of my recollection.

The committee reported recommending that White and Gold be worn and suggested several yells. The famous Techity Rex was immediately so popular that nothing else was considered at that time. The game was attended by about 200 students, this being a very representative number, and for the first time Tech students saw a college football game, displayed their colors and used their Yell. The cheering evidently was effective and played a considerable part in enabling Auburn to win the game, and doubtless had something to do with some of the old feeling, which, in view of the Game to be played on November 14th, has evidently long since become a memory only.

Yours very truly,

F. E. WHITNEY,

Hunting Park and Rising Sun Aves.

Engineers Unveil Memorial on Campus to Paul Norcross, '02

Honoring the memory of the late Paul Howes Norcross, former president of the Atlanta Chamber of Commerce and widely known civil engineer, who lost his life when the steamer Norman sank near Memphis, Tenn., on May 8th, the Georgia section of the American Society of Civil Engineers unveiled a beautiful tablet bench of marble on the grounds of the school at 11 o'clock on the morning of Friday, October 30th.

The Georgia Tech military band, and the R. O. T. C. regiment led the march to the site of the memorial. The unveiling was the signal for impressive memorial services, in which Mr. Norcross' former associates in the engineering profession paid their tributes. The committee on arrangements was headed by H. F. Weideman and included James Houston Johnston and B. M. Hall senior.

Robert Ridgeway, of New York, president of the American Society of Civil Engineers, delivered the memorial address on the subject; "The Contributions of Paul Howes Norcross to the Engineering Profession."

George W. Fuller, of New York, chairman of the engineering board of review of the sanitary district of Chicago, presented the tablet, which was formally unveiled by Harry F. Huy, of Buffalo, N. Y., president of the American Waterworks association.

Dr. M. L. Britain, accepted the tablet and Wilson Sherman Kinnear, of New York, president of American Institute of Consulting Engineers presided at the ceremony.

The unveiling of this and exercises that accompanied it were a fitting tribute to Mr. Norcross, who was not only a leader in the engineering profession of Georgia, but also was intensely interested in many public institutions in and around Atlanta.

Until his death, he was leading member of the Georgia section of the American Society of Civil Engineers. Mr. Norcross was graduated from Tech in the class of 1902 and was always an active and loyal alumnus.
Senior Memorial Bench

INSCRIPTION

IN GRATEFUL MEMORY

OF THOSE TECH MEN WHO GAVE THEIR LIVES FOR

THE CAUSE OF LIBERTY IN THE WORLD WAR

THIS MEMORIAL IS DEDICATED

BY THE CLASS OF 1925

We can add nothing more in eulogy of the class of 1925 than that as shown in the thought and spirit of their magnificent gift. Many of the other classes could well emulate the example of its youngest alumni.

This memorial faces the Academic building entrance on the one side and the Paul Norcross Memorial faces on the other. Due to the fact that our November copy was in the hands of the printers, we were unable to show a picture of the Norcross Memorial in this issue. We shall do so, however, in the December number.
Penn State 7—Tech 16

The Yellow Jackets playing in midseason form won their first intersec-
tional contest on foreign soil when they defeated the Nittany Lions from Penn State 16 to 7 in the Yankee Stadium on October 10.

Many times have the teams from Tech traveled North with bright pros-
pcts for victory only to be turned back each time holding the small end of the score. This trip however was a dif-
ferent story, and with one of the best teams in the history of football here at Tech the Jackets redeemed and avenged the defeats of the past.

No pomp or display marked the de-
parture of the Jackets for New York, but every one of them left with a de-
termination to put everything into the game.

The following description of the game was taken from the New York Times and gives in detail the main features of the battle.

"Trailing at 7-0 at the end of the first half, the Golden Tornado from Georgia Tech proved itself, like the sun, to be stronger than the freezing gale that swept through the Yankee stadium yesterday and defeated Penn State, 16 to 7.

The Penn State offensive got started early and at the outset three first downs were registered in rapid succession. Dangerfield, Lungren, Pincura and Berg-
man, a much lighter and greener combination than Wycoff, Barron, Williams and Murray, made consistent headway, while the Yellow Jackets' celebrated backfield seemed unable to do anything with the ball and was forced to kick frequently.

A gain of thirty yards on an exchange of kicks gave Penn State the ball on its opponents' 30-yard line and Pincura threw a pass to Dangerfield who scam-
ered eighteen yards after receiving it to cross the goal line. Bergman kicked a goal from placement for the extra point just before the half ended and the Pennsylvanians led at 7-0.

Faulty Kick Disastrous

Captain Basil Gray's kicking put his team in a position to score this touch-
down, but it was also his toe that paved the way for Georgia Tech to tie the score immediately after the second half got under way. Standing on his own 6-
yard line after the Southerners had kicked off, Gray sought to boot the ball out of danger. His kick was faulty. The ball went high into the air and came down almost on top of the charg-
ing forwards. Tech got the ball on State's 21-yard mark and in five rushes Wycoff and Murray carried it over for a touchdown. Williams kicked a goal from placement for the extra point and the score was 7-7.

An intercepted forward pass started Tech on its second touchdown. Lung-
ren dropped the ball thrown by Pincura and Williams snatched it as it dropped from his fingers, falling to the ground in making the recovery. Starting from their own 35-yard line, Murray, Wycoff and Barron tore the State line to shreds in one irresistible rush after another.

Tech Rushes Onward

Murray tore off 5 yards, Wycoff got 18, pushing tacklers out of his path like a giant annoyed by pigmies, Murray got 7 yards more through center and Barron 9 more through the same hole. Wycoff carried the ball 13 yards more in two rushes and planted it on the 13-yard line.

The Penn State line was helpless to stop the attack. It was impossible to block the progress of the powerful Yel-
low Jackets, and in vain Bezdek sent in a stream of substitutes. The tack-
ling became wretched. The state for-
wards were trying to stop the attack standing up and were thrown on their backs and carried bodily backward. Murray plunged through center for 6 yards and Barron got 2 more. In the vain the State rooters pleaded with their team "to hold that line." Murray carried the ball to the 2-yard mark for
a first down and Barron went through right guard for a touchdown. Williams failed to kick the goal.

A fumble by Gray on a pass from center gave Tech its last chance to score. Standing in kick formation on the fourth down, the State captain dropped the ball as it was snapped back and was unable to get the kick off. He was downed on his own 32-yard line and the ball went over. With only a few minutes left Tech tried a forward pass, its first and only one in the game, and failed.

Murray and Wycoff then earned a first down in two rushes and in three more brought the ball to the 14-yard mark. Here Williams dropped back on the fourth down and standing on his 24-yard line sent a placement kick over the bar to make the score 16-7. The game ended on the first play after the next kick-off, with State holding the ball on its own 30-yard line.

Our Great Public Issue

By Burr Blackburn

The Citizens’ Education Movement, an organization of the state’s leading business men, which was hurriedly formed early in May to assist in promoting the passage of educational legislation in the recent General Assembly, is to be continued on a permanent basis for a two years’ consistent campaign to inform the citizens of Georgia on the educational needs of their children. The citizens’ movement in the future, as in the past, will depend upon the Georgia Education Association, the State Department of Education and the State University system to outline the needs of the school system and the legislation required, but will join arms with these organizations in carrying the message to the people. A special fund will be raised for this campaign of information and an organization of business men perfected, reaching into every county in the state. With the official agencies, the teachers’ organizations, the women’s organizations and the business men lined up to fight for the rights of children, the offensive cannot be checked.

With a sum of only $4,000, the Citizens’ Education Movement carried on a four months’ campaign before the recent legislature under the leadership of Harold Hirsch, chairman, George Foster Peabody, Cator Woolford and Marvin Underwood. Thousands of speeches were delivered throughout the state at school commencements, at lunch clubs, civic organizations; speaker’s material, pamphlets and posters covering the educational needs of Georgia were broadcast; interviews from prominent citizens were secured and published; too much credit cannot be given to Governor Clifford Walker for his leadership in the campaign, nor to the district chairmen and county key men, who perfected the organization promptly throughout the state.

On September 10th a number of prominent Georgians called to Atlanta by Governor Clifford Walker and entertained at dinner at the Biltmore Hotel by Harold Hirsch, were unanimous in the belief that the campaign for a greater system of education in Georgia to which the governor, educational leaders and civic organizations have devoted themselves in the past should be carried on with unabated interest and increased financial support until Georgia’s educational facilities shall be equal to any in the country.

After reviewing the progress of educational measures in the recent session of the general assembly and discussing its importance to the development of the state, these business men constituted themselves a finance committee to raise a fund to assist the state educational institutions, the state department of education and the state teachers’ association in carrying on a campaign for a
better understanding of educational needs in Georgia.

There was an agreement that under the leadership of Governor Walker, and due to the combined efforts of many organizations, education has been brought to the front as the one great public issue in Georgia. To assure a great forward movement built on this foundation, those present decided that an aggressive campaign of information and organization should be carried into every county.

State Auditor Reports Tech Teachers Underpaid

The total income of the Georgia School of Technology for the fiscal year ending June 30, 1925, was $763,124.33, of which the state of Georgia paid $111,250, the city of Atlanta $50,000 and Fulton county $10,000, according to a report filed with Governor Walker Friday by Sam J. Slate, state auditor. The total disbursements of the institution during the same period were $724,737.19.

Auditor Slate comments on the fact that the per capita appropriation for Georgia Tech is much lower than that for any other state technological institution in the United States, and expresses gratification over the splendid development and reputation of Georgia Tech, in comparison with institutions that receive larger appropriations. He recommends that the legislature make larger appropriations for the school, in order that the salaries of the officials and professors may be increased.

"I find that the salaries for professors and instructors, as well as the administrative officials, are lower than the general average paid in schools of like character, and reflect a very economical attitude on the part of the board of trustees as well as the management of the school," the auditor commented.

For the first half of the year 1925, the total received from tuition fees was $96,134.10, the report shows. There were 452 nonresident regulars at $87.50 each; 65 nonresident cooperatives at $70 each; 947 resident regulars at $50 each, and 189 resident cooperatives at $50 each. There were 1,108 students of all classifications.

"The auditor is much gratified over the splendid development and reputation this college has made, as disclosed by study and comparison with other engineering colleges," the report says.

"No college of engineering whose financial statements I have examined shows a state appropriation of less than $160 per capita. Tech's appropriation from the state is not half this sum for the years covered by the audit, and will not reach $100 per capita, under the present enrollment for 1926.

"The nation-wide reputation of the Georgia School of Technology as one of the great engineering schools of the United States should be a source of great pride to Georgia. No one can attempt a survey of the engineering colleges of our country without being impressed with the high standing of Georgia Tech in educational circles.

"It is believed that this reputation will continue, but the auditor must sound a note of caution: If Georgia School of Technology is to maintain its leadership in the field of southern technological colleges, it must expand and grow. The board of trustees can only use the income of the school in maintaining present standards, and we believe that the board will be compelled to provide more liberally for the staff of professors, instructors and administrative officials if the same high standard of scholarship and efficient management are to continue."

"The auditor believes that the legislature will provide funds for this purpose; more especially when an investigation will show that Georgia School of Technology receives less per capita from the state treasury than do some high schools."
Florida 7—Tech 23

A crowd of some eighteen thousand wild football fans were present on Grant Field Saturday, October 17th for the Florida-Tech Game. The Florida 'Gators led by Captain Jones and supported by the majority of the student body including the band invaded Atlanta and Tech flats to settle an argument of two years standing. The argument was settled decisively by the Jackets, the outcome of the clash netting the Gators only 7 points, while the Jackets succeeded in gathering 23. This game put to an end the misunderstanding that had existed for two years as to who had the better team, Tech or Florida.

To the people from Florida the game might have been disappointing but to the supporters of Tech the outcome was not surprising, since every one was expecting the Jackets to prove victorious in this battle.

If any doubt existed as to the better team it was soon dispelled after the game started and the Jacket line began to make holes for Wycoff, Murray, Williams and Barron to carry the ball to victory. Three touchdowns and a field goal were made by the Jackets while the boys from Florida were only able to make one and this not until the last few minutes of the last quarter.

The game started at 2:30 and for a period of four quarters the Jacket team entertained the large crowd with as fine a display of football as ever seen on Grant Field. From the start to the end the team played straight football with consistent drive on the part of the Tech backs. The first score was made within five minutes after the kick-off when Chaplin of Florida fumbled and Johnny Marshall recovered it on Florida’s 31-yard line. Here began the march for the Goal Line and after a few plays, Wycoff carried the ball over for a touchdown. Ivan Williams kicked the goal thus netting the Jackets a 7-0 lead for the first quarter.

In the second quarter Williams kicked a field goal from placement on the thirteen-yard line which was the only score for this period. A touchdown by Wycoff and Murray in the third quarter completed Tech’s scoring for this game since they were unable to put the ball over in the fourth quarter.

Florida’s lone tally came in the last quarter as a result of some beautiful passing that the Jackets were unable to stop. This passing attack plus a great run by Captain Jones placed the ball on the Jackets’ four-yard line. Here they made a great stand and it required five plunges including a penalty before the Gators were able to put the ball over.

Throughout the game the Jackets displayed their superiority over the Gators, the previous hard games having made veterans out of every one of them including the large number of reserves who took part in the affair. Wycoff’s punting, the work of Merkle and Marshall at ends, Williams at quarter, Murray at full and Barron at half can not be praised too much as all of them played the game as near perfect as it is possible for it to be played. The entire team showed rare form, the line was powerful, being able to gain at will and equally good on the defensive.

Morgan Blake in commenting on the team said: “Georgia Tech’s 1925 model team is not the same type as the two other great Jacket machines of 1917 and 1920. Those were the days of the fast-stepping halfbacks, and flashing end runs. The present team is more a Dobie type of team with a rock crushing, line splitting attack, depending more on power than on speed.”
For the second time in as many years the Crimson Tide has succeeded in defeating the Yellow Jackets. With odds slightly in favor of Tech the two teams met Saturday afternoon, October 24, to determine which would be Southern Champions this year. A 7-0 defeat was handed the Jackets and unless Alabama loses to Vanderbilt or Georgia, the title will go to them again this year.

All was going well until in the third quarter when Mack Brown broke loose with Wycoff's punt from Tech's 46-yard line and raced through the entire team for the only score of the game. A beautiful play, and one that supporters of Tech will never forget. Up to that time the Jackets had had one chance to score but fate was against them and they failed.

The game was red hot from the start to the end, although the wet field slowed up both teams considerably and kept the passing game down to a minimum. In the first quarter neither team seemed to be able to gain the advantage and the ball stayed in midfield most of the time. The Alabama squad was able to stop Wycoff and the other backs and for the first time this year he was unable to gain. However he played a wonderful game on the defense. Playing side back he roamed all over the field making many brilliant tackles. He and Carter Barron were responsible for the failure of many of Alabama's end runs.

In the second quarter Tech took the ball and marched down the field for fifty yards carrying the Red line before it and for what seemed to be a certain score. But the Tide gathered forces and staged a great comeback which halted the Jackets within the shadow of the 'Bama goal. Here as a final try, a double pass was made from Barron to Wycoff, who shot the ball to Johnny Marshall after he had gotten away clear. The pass was just a little too far and Marshall made a desperate effort to grasp it, but failed and the ball went over the line and was brought back to Alabama's 20-yard mark in the possession of the Tide. That was the Jackets only real threat during the game. From then on the Tide seemed to gain in strength and the final climax came in the third quarter when Brown ran through the team for a touchdown, giving to Crimson Tide the Tech victory for another year.

Statistics of the game show that the Jackets gained 164 yards to Alabama's 128, also that the Jackets made ten first downs to the Alabama's five. Alabama never made two first downs in succession and it was only in the second quarter that they made as many as two first downs at all.

Brown was the high ground gainer with 59 yards to his credit; Barron was high man for Tech with 46 yards in 14 attempts.

Here is what the leaders in the Battle had to say:

**Coach W. A. Alexander:**
"I just want to congratulate Coach Wade and the whole Alabama team on the wonderful game they played. I want especially to congratulate Brown on that run for a touchdown. They played a hard game and a clean one."

**Coach Wallace Wade:**
"I think we beat one of the best teams in the country and I am very proud of my boys. Tech has a great team. The line is especially good. I think my boys should be commended for the fight they showed in the last half, when they were naturally worn after having been in the game from the start. Mack Brown's run was beautiful, and the way the boys rallied around him for interference showed just how hard they were fighting."

**Coach Bill Fincher:**
"I think they outplayed us on just one play, and that was when that fellow ran for a touchdown, and the interference took our men out clean. Aside from that I think Tech outplayed them."
Once again the Irishmen from Notre Dame, under the master of football coaches Knute Rockne, have invaded the South and returned home with the bacon. This time it was the second string team of the Jackets who met the Irishmen and were defeated by the score of 13 to 0. Only one varsity man, Walt Godwin, was in the starting line-up, the other ten being members of the second string. But they displayed powerful strength and after the first few minutes of play after they had recovered from stage fright they gave Notre Dame as good a fight as any team could, giving in all cases as good as was sent.

The first half was the disastrous period for the Jackets as the fast Irishmen succeeded in putting over two touchdowns, one in the first quarter and the other in the second. After that they were unable to score and were held so tight that they did not even come within the shadows of the Tech goal in the second half. However, penalties received by Notre Dame were to a certain extent responsible for failure to make another touchdown. On two occasions they were penalized fifteen yards and in each case were unable to recover this loss.

Christie Flannagan, the lanky Texan was responsible for both Notre Dame touchdowns, skirting the Jacket defense in the first period for six points. In the second quarter he again displayed his remarkable ability at dashing and went around left tackle for ten yards, adding another six points to the score, and with the extra point by Edwards this constituted the margin of victory for the cavaliers from South Bend.

With this score set the two teams seemed to settle down and for the remainder of the game kept the ball in mid field most of the time. The game for some reason seemed to lack the color of the Notre Dame games of the past. It might have been because the four horsemen were not in and that Wycoff, Williams, Barron and the other first string backfield men were out for Tech. Only seven passes were attempted by the Jackets, out of which two were completed. These passes placed the Jackets on the twenty-five-yard line where they attempted another and failed, the ball going over to Notre Dame. This was the only threat the Jackets made during the game.

Coach Rockne used his first-string at the start, but made numerous substitutions. Alexander, too, made frequent changes, most of them in the last half, and gave many of his rookies a chance to show. They did nobly in holding the fleet Irish to two touchdowns.

The statistics of the game show that Notre Dame out-gained the Jackets 171 yards to 90 and made seven first downs to two for the Jackets. Flannagan for Notre Dame gained 65 yards while Hearn for Tech gained 23 yards.

Saturday evening after the game it was announced from the Athletic Association office that a four-year contract had been signed with Notre Dame, the game next year to be played in South Bend.

May it be said to the credit of the Notre Dame men, they are clean sports and gentlemen to the core, all of which reflects every credit on their institution, their able and popular coach, and themselves. It is a great pleasure to play such a team that is neither afraid of mileage nor hard schedules.

With Doug Wycoff out of the game, Coach Alexander figured that he lost his best chance he has had in years for a win or a tie, so he decided that it would be poor policy to play all of his first line-up particularly as so many of them were on the ailing list—this he doesn't alibi about in public but which is true nevertheless.
Weddings and Engagements

Bartlett-Robertson.

A recent engagement which is centering wide social interest is that of Miss Dorothy May Bartlett, daughter of Mr. and Mrs. H. S. Bartlett, of 18 Spruce street, Inman Park, and Mr. Delmar Robertson, formerly of Atlanta, now of Buffalo, the son of Mr. and Mrs. Charles E. Robertson.

The wedding will be solemnized at the home of the bride on the afternoon of Monday, November 16.

Comly-Werner.

Syracuse, N. Y.—A wedding of prominence was that of Miss Gertrude Newbold Comly, of Syracuse, and Mr. Ray Cowles Werner, formerly of Atlanta, which was solemnized Saturday evening Oct. 24, in St. Mark’s Episcopal church, the Rev. Dr. Percy T. Fenn, rector of that church, performing the ceremony.

Howard-Lewis.

A wedding of greatest interest to society, owing to the prominence of the two families, not only in Memphis and Atlanta, but throughout the south, was that of Miss Caroline Howard, daughter of Mr. and Mrs. Chessley Bostwick Howard, and Mr. Theodore Lewis, son of Mr. and Mrs. J. W. Lewis, of Concord, Ga., which was solemnized Wednesday evening, September 9, at 8:30 o’clock at St. Luke’s Episcopal church, in Memphis, Tenn.

Lovell-Cole.

Social interest centers in the engagement of Miss Virginia Lovell and Mr. Atwood Cole, which is announced today. The marriage was solemnized Wednesday, October 21, at the home of the groom’s uncle and aunt, Mr. and Mrs. Elliott Dunwoody, in Arcadia, Fla.

Middleton-Hallman.

Widespread interest of hosts of friends, personal and inherited, throughout Georgia and South Carolina, center in announcement made by Mrs. Walter Izard Middleton of the engagement of her daughter, Miss Miriam Bridge Middleton, to Mr. Harry Hightower Hallman.

Prater-Daniell.

A very beautiful wedding was that of Miss Edna Alice Prater and Mr. Forrest Daniell which was solemnized on Wednesday evening October 14th, in First Baptist Church of Beaumont, Texas.

Simmons-Blackwell.

A wedding of much interest to a large circle of friends was that of Miss Elizabeth Mitchell Simmons to Mr. Bryan Blackwell which was solemnized at the First Methodist Church of Memphis, on October 14th.

Positions Available

We are pleased to advise that we have applications for men to fill positions as shown below. So far as we have been notified, the places have not been filled as yet.

1. Mr. W. C. Kirby, Dept. Engr., Grinnell Co., 276 Marietta St., Atlanta, Ga., a graduate engineer. Accuracy of prime importance.

2. Solomon-Norcross Co., Consulting Engrs., Candler Bldg., Atlanta, Ga., need men in Georgia and Florida for civil, municipal and hydraulic work.

5. Mr. D. W. Stockham, Sec’y. Stock-
ham Pipe and Fitting Co., Birmingham, Ala., has very splendid proposition for three young men with some technical college education to learn the fundamentals of the pipe and fitting business. A real opportunity.

6. Mr. Johns Byington, Guaranty Abstract and Title Co., 116 1-2 Orange Ave., Daytona, Fla., and 140 W. New York Ave., DeLand, Fla., wishes to get in touch with two or three graduates, preferably civils, to install abstract plant. Permanent positions, good salaries.

7. Mr. Franklin S. Clark, Gen. Mgr. Ga. Pine Turpentine Co., Fayetteville, N. C., is interested in getting in touch with a graduate, chemical or other engineer to take position of Supt. of their plant at Collins, Ga. Good pay, Fine Home, Rent Free, etc.

8. The Seminole Milk Co., Jacksonville, Fla., wants to get in touch with recent graduates to qualify as assistant to Supt. in plant handling variety milk products. Good salary and advancement.

9. Mr. Rippey of Rippey Motor Co., Lincoln Cars, Atlanta, wants two men of the persevering type—$150.00 month—drawing account and commissions.

10. Mr. Henry B. Smith, Municipal Engineering Co., Titusville, Fla., needs one Resident Engineer, two instrument men and two Rodmen.

11. Mr. A. D. Sheers, Dist. Sales Repr. A. M. Byers Pipe Co., Bisbee Bldg., Jacksonville, needs a man of about one years sale experience to cover Georgia and South Carolina. Good salary to start and expenses.

12. Mr. Henry W. Todd, Warren-Webster Co., Heating Engrs. 615 Atlanta Trust Company Building, needs several men for drafting. Salary to begin $125.00 month.

13. Mr. D. D. Fouche, Fulton Bag and Cotton Mills, Atlanta, Ga., wants an experienced man on steam or power piping layouts and drafting; one between 20 to 25 years of age. Permanent work.

14. Mr. F. T. Uzell, Archt., Ocala, Fla., is interested in our graduates in Architecture; also Mr. Horace Smith, Sec'y. The Marion County Chamber of Commerce, Ocala, Fla., will be glad to help locate Tech men in Florida.

15. W. H. Meffer, Tech '23, Florida Lime and Cement Co., Ocala, Fla., will be personally interested to hear from those of you expecting to go to Florida.

16. Mr. Walker Willis, Archt., Pensacola, Fla., can use several architectural graduates in his office.

17. C. M. Guest, Building Construction, Anderson, S. C., wants capable man for detailing building materials, plumbing, heating, etc.

18. G. F. Harley, Supt. of Construction, Stone and Webster, Columbus, Ga., are in need of two or three young engineers experienced in inspection and construction of steel and concrete highway bridges.

19. The Hollywood Light and Power Co., Hollywood, Fla., can use more Tech men in technical work and also in outside sales work.

20. J. H. McDonald, Tech '21, advises that Mr. C. B. Carrick, Bridge Engineer, Court House, Jacksonville, Fla., wants Tech men with about one year's experience in concrete detailing. Salary $200.00 to start, if qualified.

21. J. S. Schoefields Sons Co., Macon, Ga., wants a draftsman and an estimator, one who can promptly qualify to take charge of Florida Branch. Atlanta prospects see Mr. Mac Hill, Bona Allen Bldg., Atlanta, Ga.

22. R. D. Cole, III, advises that David Lupton's Sons, 801 Bona Allen Bldg., Atlanta, Ga., want men with personality for training course at $1,560.00 a year and raise during time depending on ability. Civil and mechanical men preferred.

24. Mr. John F. Glenn, Dist. Mgr. Kalman Steel Co., Candler Bldg., At-
lanta, needs two engineering salesmen experienced in reinforced concrete design; also, a good draftsman for like work.

25. Mr. Wayne Moore, Pres. Atlanta Utility Works, East Point, Ga., wants two good draftsmen for mechanical work.

26. In addition to the foregoing, you may also write the Georgia College Placement Office, 607 Chamber of Commerce Bldg., Atlanta. Almost all of the graduating classes are placed through them in cooperation with the Southern Colleges. There is no charge for this service.

27. Asst. Engineer is wanted at the State Sanitorium, Milledgeville, Ga. Salary $1,800.00 to $2,000.00 a year. Position not hard and good promotion.

28. Mr. P. R. Ritchie, Asst. Supt. in charge Business Affairs, Atlanta City Schools, needs a practical engineer of about 30 years of age to take charge of school plant operation. Salary around $200.00 a month to start.

All of the positions listed are with absolutely reliable people and offer rapid advancement. Except for the fine training courses the minimum salary to begin with is around $125.00 a month. Almost all are offering much more, particularly for men with some experience.

When writing, give your qualifications, references, education, and about the salary expected or any other information you think advisable. Unless you write legibly, we would suggest a carefully type-written letter but don’t let anything delay you.

KINDLY REMEMBER.—In trying to be of this service, we merely ask that you refer to us when writing to any of the companies, so they will realize that we are also cooperating with them. There is no fee for this service which, it is trusted, will be of material benefit both to our alumni and to the business world.

Purity and Popularity

The charm of purity is the foundation of Coca-Cola's immense popularity

Facts You Ought to Know
Typical of the fine, delicate quality of Coca-Cola is the fact that only pure cane sugar (such as you use on your table) can be used in the blend. And all other ingredients must be pure products from nature.

The Coca-Cola Company, Atlanta, Ga.
