A wheelbarrow four miles long

Ten thousand tons of coal a day travel underground on this 4-mile-long conveyor.

With its G-E motors and automatic control it almost runs itself—a thrift example for the whole world.

Somewhere in your factory, office, or home, there is a task that electricity could do better and cheaper.
Annual Meeting and Reunions, May 18

At the last conference of the executive committee of the National Alumni Association it was again decided to hold the annual national meeting on the day of the second baseball game with the University of Georgia in Atlanta, which takes place this year on Tuesday, May 18.

The Atlanta games will be played on Monday and Tuesday, May 17 and 18, at Spiller’s Field, formerly Ponce de Leon Park. This arrangement was necessitated in anticipation of the usual large crowd and due to the fact that the Atlanta team could not change its May 14 and 15 dates. Further details of this change are carried on page 225 of this issue.

On account of its proximity to the school and other advantages for the day, it was thought best to hold the meeting at 12:00 noon, in the Biltmore Hotel, adjourning at 1 p. m. for luncheon with classmates, family, friends or other “dates.” Luncheon is entirely optional, of course, and the alumni can arrange their own parties before or during the gathering.

After lunch a trip of inspection to the campus will be in order with a re-assembly at the ball park, at or before 3 o’clock, to see one of those proverbial Tech-Georgia baseball encounters.

We had a large and interesting meeting last year and the reserved alumni box at the game was filled to capacity; it is urged that those of you from out of town and in Atlanta gather in even larger numbers this year, both at the meeting and at the game. The Athletic Association will have a special reservation again for the alumni and their companions, with tickets available at the meeting for those who want them.

Prof. A. H. Armstrong has kindly offered a ticket to the game with the compliments of the Athletic Association to each of the members of the class of 1901, who are holding their quarter-centennial reunion this year. In addition to these and the alumni in general, the other classes scheduled to hold reunions are: 1906, 1911, 1916 and 1921.

A “grand and glorious” time is guaranteed; those in attendance at the last festivities will, we feel sure, vouch for this statement. A big crowd was present then and a bigger one will be on hand this time, so finish up your business in time and turn out in force for the meeting and the game. Stay young and show your spirit—you are going to see the real thing this year or we’ll go out of the predicting business.
Dads' Day On Saturday, May 1

Dads' Day, called such because it is a day when all the fathers of students are invited to visit Tech, proved such a success last year, when it was held for the first time, that it has been decided to make this a tradition of the campus and have the dads visit the school every spring about the same time.

Accordingly, plans have already been made for the entertainment of the fathers again this year, the date to be Saturday, May 1.

Letters inviting and urging the fathers to come and also explaining the purpose of Dads' Day will be mailed about the middle of April. A committee from the faculty, inter-fraternity council and the student council have mapped out a program of entertainment for the Dads on this day. The program in part follows:

At 9 a.m. the dads will be taken to the Academic Building, where they will register. From then and up to 11 o'clock, the fathers will visit the shops and laboratories, escorted by students. At eleven the entire school will be dismissed for a mass meeting in the chapel where a short program will take place. Address will be made by Dr. Brittain, a dad and a son. The Tech Orchestra will furnish music. In the afternoon they will be entertained by the various fraternities with smokers.

Ceramics Added to Co-op Courses

Ceramic engineering is now offered as a course in the Tech Co-operative Department. This brings the number of courses now offered to four, which are: A general course in Engineering, consisting of the fundamentals of Electrical and Mechanical Engineering, and courses in Ceramics, Civil and Textile Engineering.

This new course is designed on identical principles as the other co-op courses, which are proving very successful. These courses require five years, during that time the student goes to a school for a month and then works a month. By this means the theoretical phase of ceramics is taught at school and at the same time practical knowledge is obtained by actual work in the ceramics industry. This method enables the student to immediately apply to practical use the information obtained in the class room.

Where possible, the student will be permitted to select the industry in which he expects to specialize, because when a position is accepted, it is with the understanding that he will remain with the company after graduation.

Anyone interested in this new course may obtain further information from Professor McDaniel, director of the Co-op Department, and Dr. Henry, head of the Ceramics Department. Only those will be admitted to the course who have the approval of Dr. Henry and a satisfactory scholastic standing for their Freshman and Sophomore years.

From present indications and the interest shown by the inquiries made by ceramic engineers from all over the country with regard to employment of ceramic co-op students and graduates, the prospects are very bright for this course.
Nominations in Order for Officers
National Alumni Association

Your attention is respectfully directed to the bottom of this page, where there is printed a nomination blank which all local Tech clubs and active members of the Alumni Association are earnestly requested to act on at once and mail in to the Secretary, National Alumni Association, Georgia Tech, Atlanta, Ga., so that it will reach his office no later than May 1.

If you have paid your 1925 or 1926 dues to the National Association you are qualified to make your nominations. Local clubs are requested to call meetings and to send in their nominations at their very earliest convenience prior to May 1. We are further asking that members of the various classes from 1890 through 1925 nominate a class secretary whose business it will be to keep in touch with all members of his class, with the co-operation of the National Association, and to keep the latter informed as to the members of the class and their activities and to work up class reunions.

Due to the fact that all funds are handled and disbursed by your National Treasurer, after office records are made, may we not suggest that you nominate some Atlanta alumnus, who is willing to give up a lot of his time to this work. Your present treasurer, Ed C. Liddell, has performed his duties faithfully and well during his first term of office and as it has been customary to return the incumbent for another year of toil, as compensated with honor only, the executive committee of the National Association has endorsed your present treasurer for a second term of office.

The president has always been elected from the alumni in Atlanta or its near vicinity, as his presence is very necessary at the many meetings as held throughout the year. At least one vice-president is chosen from the alumni outside of Atlanta, which is considered an honor equal to that of being elected to the position of president.

The association is doing some very fine work under the direction of its officers and it is trusted that you will nominate those of most loyal inclinations who will give freely of their time and abilities toward the successful conclusion of these and other projects.

Regardless of any of the foregoing views, however, you are the judges in the matter, so please give us the immediate benefit of your decisions, on the following ballot.

1926 Sluggers Out

Coach Clay's Yellow Jackets, after a strenuous six weeks of training, opened the 1926 baseball season with a two-game series with Clemson on March 19 and 20, winning the first by a 5-2 score and losing the second 6-5. Both games were played on the new diamond opposite Grant Field.

In the first game the Jackets had things easy and experienced no difficulty in maintaining a lead throughout the game. Coach Clay took advantage of this opportunity and tried out several of his pitchers. Johnny Snead started in the mound position and held the visitors scoreless for two innings and was replaced by Hugh Gaston, a recruit from last year's Freshman team. Gaston was later replaced by Fleming, another star from the frosh of last year. All of them showed up exceptionally well.

Homers by Tom Angley and Captain Bob Reeves, and fast work of the infield were features of the contest. Brewer at first, and Crowley at third, both newcomers in the Jacket lineup, did splendid work together with Moreland at second and Reeves at short. Angley did the receiving, while Wycoff, Yoe- mens and McCash held down the outfield.

The second game was a thriller which turned out to be a 10-inning affair, and a defeat for the Jackets. Snead started on the mound for the locals and held the invaders in check while his teammates piled up a comfortable lead. He was succeeded by Flordid, Chassion, and Edwards but his successors did not fare so well and the lead was soon lost as Clemson forged ahead, and nosed out the Jackets for a victory of one-run margin.

The Jackets’ next two-game series was with Ohio State, which was played on March 26 and 27, the Jackets being victorious in both games by large margins. In the first game Tech went wild and succeeded in piling up a 10-1 score. Home runs and three-base hits, together with bad fielding on the part of the Ohioans was responsible for this large score. Conn started at the mound position and pitched for six innings, when he was replaced by Gaston, who pitched the seventh. Cold weather and darkness caused the game to be called off at the end of the seventh inning.

The second game was almost a repetition of the first so far as the scoring was concerned, the final score being 11-4 in the Jackets’ favor. Flordid started the game for the Jackets and held Ohio State to two hits until the seventh inning, when he was replaced by Chassion, a recruit from the frosh of last year. Tom Angley and Bob Reeves, living up to their reputation as hitters, succeeded in slamming out two homers in this game.

Notre Dame followed on April 2 and 3, and succumbed to the slugging Jackets in both games, 8-0, and 12-4.

Freshman Nine Has

The schedule of the Tech Freshman nine for the coming season will be one of the hardest ever played by a Junior Jacket team. Twelve games with college freshman teams have been arranged by Coach Mundorf, besides several others with high schools in Atlanta. The Freshmen will play Oglethorpe, Auburn, Monroe A. & M., University of Georgia, and the South Georgia Aggies in Atlan-

For Championship

ta this spring. They will make trips to Auburn and Athens.

One of the most interesting series of the season will be with the South Georgia Aggies on Grant Field. The Aggies are coached by George Griffin, Tech graduate and for several years head track coach. He left Tech last year to take a position with the Tifton institution as head coach and has turned out several good teams.
Auxiliary Gives Colors to R. O. T. C.

New silk regimental colors were recently presented to the Tech R. O. T. C. regiment by the Georgia Tech Woman’s Auxiliary through the president of the organization, Mrs. Samuel Inman.

The regiment formed as usual for the regular Monday afternoon parade. In the reviewing stand were Dr. Brittain, Colonel Pearce, Mrs. Inman, several sponsors and other officers, besides several members of the auxiliary.

After the regiment had been presented to the reviewing officer, Mrs. Inman tendered the flag to Colonel Pearce who in turn gave it to the charge of the color guard and the cadet colonel. The flag was saluted by the regiment while the band played “The Star-Spangled Banner,” after which the entire regiment marched in review before the stand.

Pittsburgh Reports Fine Meeting

Our initial meeting for 1926 was held in the Dudley Tea Room, on the evening of February 20th.

Around 7:45 Mr. W. L. Williams hinted in no uncertain manner that it was far past the dinner hour of any self-respecting man. Strange to say, all the fellows seemed to be tuned to about that wave length, and spontaneous reception occurred.

A genial crowd, an excellent dinner, and a common interest sponsored a reminiscent hour. The waitresses, doubtless wondered how men such as “Uncle Heine,” “Tobe” Edwards, “Pop” Cooledge, “Bull Montana,” and all the rest could still be in existence after living through the tales as related by our veracious alumni.

As a result of Mr. W. C. Stevens’ initiative and personal efforts, “Uncle George” extended us the courtesy of his latest “Super-Het,” along with auxiliary equipment. Under the loving guidance of Mr. S. Batchelder from the radio department, we caught music from Nome to Naples.

Simultaneously with the coffee and smokes, Acting Chairman Bates requested the meeting “to come to order.” Reading of the minutes was necessarily dispensed with as this document was A. W. O. L. Following Mr. Bates’ suggestion, each man present introduced himself, supplementing his name with correlated facts. Those present were: Messrs. W. E. Bates, Jr., H. N. Blackmon, E. P. Courier, H. N. Hill, F. G. Kelly, T. P. Kirkpatrick, T. G. Lane, E. B. Newill, T. H. Mize, J. L. Parsons, E. B. Phillips, E. L. Skinner, W. C. Stevens, B. B. Talley, L. H. Tippins, W. L. Williams, Jr., H. W. Wilton.

It was our pleasure to have Mr. Courier, who is only in this district temporarily, as our guest. Several transient alumni dropped in for a few moments. "Those sweet young things" however afforded too keen a competition.

New officers were elected by the usual procedure. The fight waxed hot; so hot indeed it suspcioned "ye ole college frame-up"—each office was carried by unanimous assent.

President—W. C. Stevens.
Vice-President—B. B. Talley.
Sec.-Treas.—H. N. Blackmon.

Mr. Bates transferred the meeting to President Stevens. Inquiry by some of the older alumni was made concerning changes and improvements at Tech in recent years. The president, who visited there last September, aided and abetted by the 1925 members, detailed in length the eminent items of Tech’s growth. Satisfying eventually, an imposing battery of questions, things quieted momentarily. Mr. Mize figured
by sitting still and keeping quiet he would evade a speech. His policy has a lagging power however, for President Stevens had him “spotted.” Mr. Mize delivered a concise and interesting talk on the Co-op work in the Columbus, Ga., Railway Shop. Mr. Skinner, ’25 Co-op, volunteered additional information on that course in answer to various questions. A general discussion followed, the conversation veering to Tech athletics, past, present, and future, while waiting for returns on the Georgia vs. Tech basketball game.

During all this Mr. Batchelder was fondly nursing the Radiola 28, hoping to hear it yell “W.S.B.” Even the most credulous “radio fan,” however, gives one the air “if you report a station before it begins transmitting,” all of which goes to show why our worthy detective failed to locate “The Voice of the South” until past 9 o’clock. A suggestion that we send the team a telegram received immediate and whole-hearted attention. From then on to the final whistle, we followed the ball around the Atlanta court play by play. We lost, but with the consolation that “the Red and Black” quintet had worthy foes.

After the resulting general discussion had subsided, the president called for other business. The matter of national dues came up; also the securing of the Georgia Tech Alumni for every member. The secretary was instructed to write the National Association regarding these matters, and also to render to the national secretary a report of this meeting for publication.

The suggestion of Dr. Crenshaw regarding the annual dinner of Tech Alumni on Ex-Governor Harris’ birthday was discussed with a great deal of interest. Mr. Tippins made a suggestion, which was adopted unanimously, that the secretary of the National Alumni Association be notified that the Pittsburgh chapter of alumni considered the suggestion of Dr. Crenshaw an excellent one and that we give it our endorsement.

By common assent our next meeting was scheduled for April, the exact date to be stipulated later.

Motion for adjournment was made and carried.

HENDLEY N. BLACKMON, Secretary.

WGST Radio Programs for April

Monday, April 12—Concert by the Ga. Tech Band, Frank Roman, bandleader.

Thursday, April 15—Washington Seminary Glee Club, Mrs. L. Lela, director; speaker, Prof. Floyd Fields, dean of men, on “Freshman Orientation.”

Sunday, April 18—Special operatic program, sponsored by Signor Emilio Volpi.

Monday, April 19—“Talk Back Home” program, by Tech students; Ga. Tech Marionette Quartette.

Thursday, April 22—Coleman D. Kimbro, baritone; speaker, Dr. D. B. Wroth of the Department of Chemistry, on “Fixation of Atmospheric Nitrogen.”

Monday, April 26—Ga. Tech Marionette Orchestra, playing the popular song hits since 1915.

Thursday, April 29—Mrs. G. E. Cooper, contralto; speaker, W. L. McEver, assistant professor of Experimental Engineering, on “Heat Saving Methods in the Home.”

The Monday or Tech Night programs from 9-10 p. m., C. S. T., are furnished by Tech students and faculty; there are no talks, as a rule, given on these nights.

On Thursday nights, 7-8 p. m., C. S. T., the Artist Series programs are given. The short talks at the end of the hour usually by Tech professors, add the only college flavor to these programs.

Disabled Veterans to Convene in Atlanta

With the opening of convention committee headquarters in the mezzanine of the Ansley Hotel in Atlanta during the last of March, preparations for the sixth annual national convention of the Disabled American Veterans of the World War, were formally launched by a joint committee of leading citizens of Atlanta and its local disabled veterans. The big conclave will be held in Atlanta, June 21 to 26, inclusive, and is expected to attract at least 5,000 wounded and disabled world war veterans to the city.

An invitation has been extended to President Calvin Coolidge and Mrs. Coolidge to attend the convention and if the president accepts the bid of the national D. A. V. officers and Atlanta and Georgia civic and state officials, it is believed the attendance of disabled veterans from all parts of the United States will be trebled and possibly quadrupled. The president's attendance would also add to the great numbers of out-of-town people expected from all sections of the South to witness the spectacular events of the convention.

Madame Ernestine Schumann-Heink, world-famous prima donna and beloved "Gold Star Mother," is to follow her annual custom of attending the convention at her own expense, and singing for her "boys."

Wearers of the congressional medal of honor, distinguished service cross and other extraordinary decorations, the national commanders of various patriotic and veterans' societies, and numerous other prominent national and international heroes, will be in Atlanta for the Disabled American Veterans' national gathering.

Radical Changes in Football Rules

At the final meeting of the inter-collegiate football rules committee in New York on March 20 two radical changes in the rules governing intercollegiate football were adopted. The two rules corrected the abuse of the forward pass and the safety.

The new rule concerning the forward pass provides that:

When a second or third incomplete forward pass shall be made before the first down has been made, a penalty of five yards shall be imposed.

This rule, according to E. K. Hall, chairman of the rules committee, was written to curb the indiscriminate use of the forward pass and to prevent stalling in the last few minutes of the game. It will be remembered that last year many teams after having gained a substantial lead, would in the last few minutes of the game resort to wild forward passing to kill time without the danger of a penalty.

The second major change in the rules was directed against the abuse of the safety. The old rule provided that in case of a safety, the ball shall be brought out to the 30-yard line of the team holding the ball. The new rule provides that in case of a safety, the ball shall be brought out to the 20-yard line of the team holding the ball and that the opposing team shall line-up on the 30-yard line making a restraining zone of 10 yards. The team in possession of the ball, instead of having the privilege of scrimmage, will have to kick—either by punting, drop kicking or place kicking. This provides for an onside kick and the ball is free when it leaves the toe of the kicker.

Two minor changes were also made in the rules.

One provides that a player on the side making the kickoff, who steps out of bounds, is not eligible to recover the ball. The other change concerned the section governing ground rules. The new rule makes a ball automatically dead that passes the sidelines or the end zones and prevents any scramble for the ball out of bounds.
Marionettes Will Take To Road

With rehearsals now taking place regularly the Marionettes have nearly set the cast for their new spring play, "The Back Slapper," and Joe Duckworth, the new director, is very well pleased with the showing made in the practices. During the past week the work has been directed toward outlining the play and getting it set.

Mr. Duckworth is especially pleased with the latent talent he has discovered among those trying out for female parts, and he believes that he will be able to make more prominent the name which the Marionettes have earned through their female impersonations.

"The Back Slapper" is different in theme from anything that the Marionettes have attempted before, and it offers ample opportunity for dramatic action.

Permission has been obtained from the faculty to take the play on a number of week-end trips, after which, performances will be given in Atlanta on May 7 and 8. It is trusted that the out-of-town and home alumni will support the Marionettes with a big attendance at their respective shows, as they will have the pleasure of witnessing one of the best plays the Marionettes have ever produced.

Extra—Lacrossers to Meet Georgia!

Dr. J. B. Crenshaw, the founder of lacrosse in the South, has assembled his wicket slingers on Grant Field to begin practice for the season. Up to this time the football team has been using the field for its daily spring workouts, leaving no place for the lacrosse team to do its work.

A few of the more ardent aspirants of the game could not wait for the first call to arms and have been hurling the little black ball back and forth across the field in a bit of preliminary practice. The team this season will find many of the football players listed in the line-up, among whom will be Mack Tharpe, Carter Barron, Sam Murray, Owen Pool, Bull Irwin, and several others who are anxious to participate in the strenuous game to develop a lot of speed before next fall.

Every one of the football players who played lacrosse were well satisfied that it was this work which gave them a lot of speed they did not possess before. Carter Barron, using the pivot learned on the basketball floor from Coach Harold Hansen, played rings around the Fort Benning team last year.

So far eight games have been arranged, four with the Georgia Bull Dogs and four with Fort Benning. Dr. Crenshaw stated that the dates for theBenning games were not as yet definitely settled due to conflicts with baseball schedules at Benning. The four games with Georgia will be April 28 and 24 and April 30 and May 1. Two games will be played in Athens, and two in Atlanta on Grant Field.

Rifle Team Wins Match

Shooting a 7,565 score out of a possible 8,000 the Tech rifle team won the Fourth Corps Area rifle match against the leading colleges and universities in the corps area. The Jacket sharpshooters blazed away on the four stages, including 80 rounds in all, and every member of the squad turned in comparatively high scores. The results of the match were not made known until all scores of the teams had been compiled in the office.

In this match both high schools, prep schools, colleges and universities fired
at the same time but the match was divided into a senior and a junior division. The Jackets won in the senior division with the University of Georgia second, Florida third and North Carolina State fourth. The Jackets led the Bull Dogs by a scant margin of 21 points, while the Athenians were high over Florida by 103 points. The four leading teams in each division will fire in the national match for the Hearst trophy award.

Note Change in Tech-Georgia Atlanta Baseball Dates

As stated in the opening article of this issue, Tech and Georgia will play the last two games of their series in Atlanta on May 17, 18, at Spiller’s Field, formerly Ponce de Leon Park. The games will begin at 3:30 sharp.

It was necessary to make the foregoing change, due to the fact that the new baseball field at Tech has a seating capacity for only 2,500 spectators. This will not interfere with the Annual Meeting or Dads’ Day, as Spiller’s Field will be just as convenient to the meeting places as Grant Field, and everybody will be afforded a good seat unless, of course, the park is filled to overflowing which may easily turn out to be the case.

Results of games at this writing and remaining schedule, follow:

March 26-27—Ohio State, in Atlanta; Tech, 10-1; Tech, 11-4.
April 2-3—Notre Dame, in Atlanta. Tech, 8-0; Tech, 12-4.
April 9-10—Auburn, in Atlanta.
April 14-15—Uni. of Ala., in Atlanta. April 16-17—Univ. of Ala., in Montgomery, Ala.
April 22-23—Oglethorpe, in Atlanta. April 24-25—Vanderbilt, in Atlanta.
April 26-27—Univ. of N. C., Chapel Hill, N. C.
April 28-29—N. C. State, Raleigh, N. C.
April 30—Univ. of Va., Charlottesville, Va.
May 1—Univ. of Va., Charlottesville, Va.
May 14-15—Georgia, in Athens.
May 17-18—Georgia, in Atlanta.

Jackets Enter Penn Relays

Having definitely decided to enter a team in the annual Penn Relay Carnival to be held April 23 and 24 in Philadelphia, Coach Hal Barron is hard at work pruning the squad, getting together his crack quartet who will wear the White and Gold colors against strong teams in the track classic. The relay race will be over a mile distance and will be against the leading technical schools in the country. The winning team will be mile champions of the technical schools of the world. With a world’s championship at stake the team has been showing some exceptional speed lately which gives hopes of possibilities in the carnival.

This trip to the Penn Relays is the feature of the Tech schedule this season, although the Jackets will meet the best track teams in the South in dual meets and then will face the stiffest sort of competition in the annual Southern Conference meet to be held at Chapel Hill just before the season closes. The annual Southeastern A. A. U. championship meet and the Georgia State meet are also on the Tech calendar. Last year Mass. Tech won the mile classic for technical schools at the Penn Relays, stepping the four laps in 3 minutes 29.1-5 seconds. Joffee, Cowlett,
Davidson and Linnes carried the Massachusetts colors to victory and it is rumored that that same quartet will be back this spring.

Coach Barron also announced that in addition to the relay team to be entered no doubt Ed Hamm, former Lonoake, Ark., High School star, holder of the national interscholastic broad jump record, will also make the trip to Philly.

Wilder to Captain Basketeers

T. A. Wilder, alias "Dynamite," will captain the Tech Varsity basketball quintet of 1927. At the annual basketball banquet held at the Capital City Club, "Dynamite" was elected to this honor and Cecil Jamieson was voted alternate.

"Dynamite" has played on the Tech five for two years and though short in build he makes up for his diminutive size in speed and excellent floor work. He is without a doubt as hard a fighter and as full of spirit as any man wearing a Tech letter, Wilder plays forward. He was awarded a silver basketball trophy at the banquet for his all-round ability and improvement during the season by Coach Hansen. "Dynamite" deserves all the praise and tokens of appreciation that he has received and it is believed that he will lead a winning five on the floor next season, since the material is plentiful for the coming year.

Cecil Jamieson, though playing his first season as a regular this year, came forward with the necessary ability and strengthened the Yellow Jackets at a critical time. Cecil is a standing guard. Ever since he came to Tech he has steadily trained and his efforts have finally been rewarded in his appointment to the position of alternate captain.

Sophomore Wins Cross Country

Battling a strong, chilling wind blowing from the northeast, Erroll Dawson, diminutive Sophomore from Haynesville, La., breasted the tape to establish a record for the new four-mile course in the thirteenth annual cross-country race held on March 13. The young harrier made a gallant finish after stepping the gruelling grind in 21 minutes and 25 seconds. R. V. Brewer, Freshman, was second with James Haynesworth, third.

Dawson now holds the distinction of being the first record holder for the new course which no doubt will be the standard in the future. Herbert Gattis won the race last year, being the first Freshman to win the classic. His time for the three and a half mile course was 18 minutes and 22 seconds.

East Point, Ga.
Standard Class Rings Now Available

Arrangements are now complete for the standard "Senior-Graduate" ring, the contract not only having been signed by the Student Council of Georgia Tech but has been approved also by both Dr. Brittain and Dean Skiles. The classes of 1926, '27, '28 and '29 are also Jones Company enables all past, present or future Georgia Tech graduates or those who were passed to their senior classes, to have the same type of ring, the company having already copyrighted the adopted design, in the name of the school, at their expense. The rings are to be sold to present graduates and alumni at wholesale from the factory. Alumni of other years in doubt as to their rating, who wish rings of this design, must have the approval of the school authorities or the secretary of the National Georgia Tech Alumni Association.

The Student Council of Georgia Tech has agreed to co-operate with the company in discouraging the student from buying any other ring, not the authorized one. Of course, if an alumnuus prefers, he may order from his own dealer or manufacturer, but the standard design must be the same as the one shown, as copyrighted by the school and Student Council.

The ring will be of the regular heavy class ring type and may be had in white, green, or old gold and a stone of the buyer's choosing, with the class year shown on one side and course on the other. Any eventual re-sizing or repairing will be done for cost at the factory.

In addition to standardization, it was shown that the highest quality at the smallest cost would be assured under the agreement.

Celebration Date

At the March 10th session of the executive committee, it was thought best to submit the suggested annual celebration date to a vote of the alumni present at the yearly meeting. The idea was unanimously endorsed, but as there were several suggestions as to whether the "round the world get together" should be held on Founders' Day or otherwise, it was felt that the particular time should be passed upon by the To Be Voted On alumni as a whole. Suggestions from members out of the city will be presented for consideration and action will be taken on them together with the others.

The date of the regular annual business meeting was selected as already stated in this issue, and the matter of class rings was left to the individual order of each graduate, or former student who has passed up the junior year in his particular course.

Another Greater Tech Expansion Unit, now under construction on Techwood Drive. Bush-Brown and Stowell, Architects; Herbert Gailey, Assoc. All members Tech Architectural department.
Do Your Part, Alumni

It is sincerely hoped that those of you who are neither “active” members of the National Alumni Association nor “paid up” subscribers to the Alumnus will, at least, give this article your consideration.

By the time this issue reaches you, our 1925-26 notices should be in your hands; unless, of course, you are among those who have already paid their current alumni dues, or the class of 1925 which is exempt until after the fiscal year ending May 31.

It has been our pleasure to carry a large number of you in addition to our regulars, unless, of course, we have been advised to the contrary; now, we are asking that you, in turn, do your part by us if we have been of any service or interest to you at all.

The total amount of alumni dues received so far this year just about covers the cost of the Directory Number of the Alumnus only! When almost all other colleges ask anywhere from two to five dollars for a single copy of their alumni directories, it seems that an appeal for more active subscribers and alumni members is quite out of order, when we have asked nothing in addition for our directory not to consider the regular issues that have gone to you in addition to our many other services, all of which we would gladly render free of charge if some kind philanthropist would heavily endow us.

Employment bureaus charge as much as 50 per cent of a man’s first month’s salary for their services; we are doing a bigger job, we feel sure, than these professional concerns, particularly for the younger alumni and charge nothing! You may not be effected, but don’t you want to see this and other services continue? Perhaps you haven’t thought of the matter in that light or we would have greater co-operation, we know.

If your “ship hasn’t come in,” don’t give this another thought for we are going to stay by you with the Alumnus, and any other services that we may have to render. Those of you, however, who can easily afford from about 20 to a little over 40 cents a month and don’t think we are doing a job worth that much to you please instruct us to “discontinue,” which you would have done long ago, we believe, had you not intended eventually to do your bit. We know you have the “ole spirit,” men, and are counting on you to see us through now and always. Regardless of your action, remember that we are always for you.

Positions and Applicants

Mr. G. Rowland, Tennessee Electric and Power Company, Chattanooga, Tenn., needs several recent graduates. Mr. Rowland is a Tech man.

Mr. A. M. Fairlie, 1509 Citizens and Southern Bank Building, Atlanta, Ga., wants a chemical engineer at a salary of $200 to $225 per month for work in the sulphuric acid department of his company at Copper Hill, Tenn.

Prof. D. Donaldson, superintendent, Louisville Academy, Louisville, Ga., needs a young man as principal for the coming year, one who can take charge of athletics and teach in the high school.

American Rolling Mill Company, Middletown, Ohio, Mr. C. H. Murray, superintendent of employment, has several positions for graduate civil engineers interested in sales or promotion work. One position requires three or more years railway experience and the others of like time on highway construction. About $225 to start with good opportunity for advancement.

Mr. R. N. Nichouse, manager, Sumter Gas and Power Company, Sumter, S. C., wants a graduate in engineering chemistry or mechanical to train for position as manager of the gas department. Salary $100 and commission, to start.
Addenda to Directory

As corrections and additions are received to our Directory number, we shall publish them as addenda to the issue under this heading. In order to keep your Directory up to date, we would suggest that you clip out and paste the names shown in these columns under their proper classes and index, in alphabetical arrangement.

WHAT IS THERE TO THESE "SUCCESS STORIES"?

Probably you have sometimes wondered, "Where do all the ‘success stories’ come from? Can they really be true? Is there any one thing that can actually make men successful?"

Our answer will perhaps surprise you. For we say without hesitation that most of the men whose success stories we have published would have been successful without the help of the Institute.

We don’t take credit for the fine records made by our graduates any more than Yale or Princeton or Harvard take credit for the success of theirs. We provide no trick formulas to make men prosperous overnight. We simply give them the facts they need to know about business. If they are big enough to use these facts, they succeed. If they aren’t—well, they would have failed anyway.

What the Institute does—and the only thing the Institute claims to do—is this: it brings success sooner.

... ... ...

The reason why independence comes so fast for most men is that there is so much to learn.

Only a man who knows all the different departments of business is qualified to reach the higher positions, or to enter business for himself. And learning all departments from practical experience in each is a matter of many years.

Is there no way to shorten this process? Must every man’s life have so many wasted years? The men whose success stories you have read determined to eliminate those wasted years from their lives; they found a way in the Alexander Hamilton Institute.

For years we have specialized in the single task of training men for the higher executive positions of business. Into the Institute’s Course have been built the experience and the methods which have made many of today’s business leaders successful. Its subscribers learn in months what ordinarily takes years.

That the Course is authoritative and practical is proved by the calibre of the men who constitute the Institute’s Advisory Council. They are:

General T. Coleman duPont, the well known business executive; Percy H. Johnston, President of the Chemical National Bank of New York; Dexter S. Kimball, Dean of the College of Engineering, Cornell University; John Hays Hammond, the eminent engineer; Frederick H. Hurdman, Certified Public Accountant; and Dr. Jeremiah W. Jenkins, the statistician and economist.

A booklet has been especially prepared that gives all the facts about the Institute. More than 100,000 college men have read it. If you would care to have a copy, write us.

ALEXANDER HAMILTON INSTITUTE

Yours for the asking—

ENGINEERING BULLETINS

Every engineer will find much of interest and value in these well-written bulletins, which we will gladly furnish free of charge.

—"Railway Engineering & Maintenance."
—"How One R. R. Replaces Trestles with Corrugated Culverts."
—"Strength of Armco Corrugated Iron Culverts."
—"Electrolytic Theory of Corrosion."
—"Proper Methods of Culvert Installation."
—"Durability of Galvanizing on Corrugated Metal Pipe."
—"What is the Life of a Corrugated Culvert?"
—"Headwalls for Pipe Culverts."
—"Parallel Drains on Public Highways."
—"The Problem of the Culvert Foundation."
—"Culvert Location."
—"Conditions which Influence Culvert Relocation."
—"Some Reports of Corrugated Culverts in Railway Service."
—"Preventing Highway Erosion with Corrugated Pipe."
—"Corrugated Culverts on Western Pacific."
—"Culvert Placement Under Existing Fills."
—"Use of Large Size Corrugated Pipe."
—"Undermining of Culverts, Cause and Prevention."
—"Transverse Forces in Fills."

Simply tear out this advertisement, check the Bulletins you want, and mail it to us with your name and address.

We recently asked 6,000 people why they like Coca-Cola

The people questioned were citizens of Atlanta and St. Louis.

Words used to express their meaning varied, but the thought in each answer was the same—that Coca-Cola is “delicious and refreshing.”

A Standardized Drink

The time, energy and money spent to have every drink of Coca-Cola served up to the same high standard of quality is the chief function of the whole great Coca-Cola organization. As a result, the United States Supreme Court pronounced Coca-Cola—“a single thing coming from a single source, and well known to the community.”

The Coca-Cola Company, Atlanta, Ga.
