Recognition, Reputation, Repetition

JUST a quarter of a century ago four young men, with a broad background of training and experience in the engineering construction field, formed The Foundation Company. Today the company is at work in every continent, in both hemispheres, and on both sides of the Equator, on engineering construction of almost every known type.

DURING the early years the activities of this organization were centered on Manhattan Island and principally on its southern tip where foundation work was most difficult; now, subways in England, river control and land reclamation in Greece, bridge piers in Japan, a power plant in Venezuela, dredging in Colombia, and general construction of all kinds in Peru, are some of the many undertakings of magnitude engaging The Foundation Company, all over the world.

As indicative of the service rendered by The Foundation Company over this period of years, these partial lists of repeat contracts have special significance. In one case no less than thirty contracts have been awarded by one owner.

BUILDERS OF SUPERSTRUCTURES AS WELL AS SUBSTRUCTURES
HAVE YOU SPOKEN TO A few days ago, your
YOUR REPRESENTATIVE? president, Mr. C. L. Em-

er son sent out letters to
all the alumni in the State of Georgia living outside of At-
lanta and it is sincerely hoped that those of you who re-
evived the message have already done your part in con-
nection with it.

The Atlanta alumni have been addressed at several of
their recent meetings by Dr. Brittain and others and the
response has been very gratifying. However, for the ben-
efit of those out of the state, as well, and lest any of us
forget, we are again calling your attention to the contents
of the letter which is, as follows:

"Dear Alumnus:

The Legislature of Georgia will convene in Atlanta on
June 22. The income which Georgia Tech may expect
from the State for two years will be in the balance. The
needs of the School are increasing steadily as the number
of students increases and the curriculum is improved. The
enrollment this year is 150 more than any previous year.

Dr. M. L. Brittain, ever since his election to the Presi-
dency, has spent his time and energies freely in proving to
the Legislature the needs of the School and its true value
and our position is better than it has ever been, but the
support accorded Tech is still far from being as generous
as that which our sister colleges receive from their various
states.

All of us are vitally interested in the success and pro-
gress of Georgia Tech. This is not only an unselfish in-
terest, but when we analyze the situation, it is clear that
the prestige of the School adds to the material success of
every alumnus.

We are asking one very easy and definite favor of you.
Please go and see your Representatives and Senator and
ask them to be as fair and generous as possible when the
matter of the appropriation for Tech comes before them.

We would be glad for you to write our Alumni Secretary,
Mr. R. J. Thiessen, the result of your conference with these
gentlemen.

After the legislators reach Atlanta their time is so
much taken up and they are so harrassed by various inter-
ests that any effective work is most difficult. Right
now is the time to get their attention and let them know
that the School has friends.

Anything you may do now will be doubly appreciated by
the writer, the Alumni Association, Dr. Brittain and
the Trustees.

Cordially yours,
NATIONAL GA. TECH ALUMNI ASSOCIATION
By C. L. Emerson, President."

That’s the story, alumni; if you haven’t done your part
as yet, please do so AT ONCE.

ATTENTION The foregoing doesn’t apply to
INACTIVE ALUMNI those of you who have at any
time subscribed to the Georgia
Tech Alumnus or who have paid dues to the
Alumni Association; it does concern the majority of you
as shown in the Annual Report, published last month, and
we again ask all concerned to give every consideration to
our April communication, which reads:

"In order to continue the progressive work of the Na-
tional Georgia Tech Alumni Association, it is necessary
for us to have more of our Georgia Tech men as active
members of the association or supporting subscribers to
the Georgia Tech Alumnus.

Although we have been trying to keep in contact with
you through the regular mailing of the Georgia Tech
Alumnus and Directories upon issue, together with the
services of the organization, our present records show that
we have never had you as an active member of the associa-
tion or as a subscriber to our publication; if we are in-
correct in this matter, your immediate advices will be appreciated.

The subscription to the Georgia Tech Alumni is $2.00 for the year and we hope that you can see your way clear to back your organization. It will be helpful that you will prefer to become an active member of the association, the yearly dues for which are $5.00, this includes your subscription to the Alumni.

If there is any reason why you can’t become interested in this proposition won’t you kindly let us know at an early date. Best of luck and success to you.”

We’ll be glad to carry on for those of you who are “hard pressed” at present but it is rather unfair to expect us to shoulder the load for as many of you otherwise situated. We know that your idea too, old-timers; so what about a little support right now?

National Alumni Officers for 1927–28

Balloting for officers of the National Georgia Tech Alumni Association was closed on June 1, with the end of the 1926-27 fiscal year, and we are pleased to announce the elections for the coming term, as follows:

President—Mr. C. C. Blackwell, DeSoto Garage, ’18;
Vice-President—Mr. H. T. Knapp, Engineer, ’13;
Sec-Treas.—Mr. J. F. McLendon, Chamber of Commerce, ’26.

Mr. Knapp presided over the meeting and we had several very interesting talks. The following were on the program:

Mr. C. C. Blackwell, Mr. J. E. Roberts, ’03; Mr. Frank Berry, ’21, Marion, Arkansas, and Mr. F. G. Prout. Mr. Prout, though not an alumni, is one of the leading engineers of the city, and is showing an interest in the club. He has one tech man in his employ.

Mr. Montgomery Hill, ’11, National Board members, was present and made a very inspiring talk, and offered his assistance in any way possible, which was duly appreciated.

On the attached sheet you will find a list of those present; also, now that we have organized, we will appreciate your sending us a charter.

We are all back of Tech in everything and if at any future time there is anything that we can do, don’t hesitate to call on “The Memphis Georgia Tech Club”.

Yours very truly,
J. F. McLendon,
Secy. and Treasurer.

Memphis Organizes Tech Club

In accordance with plans which have been under way for the last few months, the Memphis, Tenn., Alumni organized a Georgia Tech Club on May 20.

J. F. McLendon, ’26, one of the active organizers and newly elected secretary-treasurer of the club, sends in the following report:

Mr. R. J. Thieson
Memphis, Tenn.
Secretary
National Alumni Association
May 20, 1927.

Dear Jack:

We had our meeting today as per schedule and it was a great success. The men present showed lots of interest and spirit and we are going to help boost and further the interest of Tech in all ways possible. We had an orchestra to play rambling Wreck and this pepped things up lots.

The following officers were elected:

President—Mr. C. C. Blackwell, DeSoto Garage, ’18;
Vice-President—Mr. H. T. Knapp, Engineer, ’13.
Sec-Treas.—Mr. J. F. McLendon, Chamber of Commerce, ’26.

Mr. Knapp presided over the meeting and we had several very interesting talks. The following were on the program:

Mr. C. C. Blackwell, Mr. J. E. Roberts, ’03; Mr. Frank Berry, ’21, Marion, Arkansas, and Mr. F. G. Prout.

Mr. Prout, though not an alumni, is one of the leading engineers of the city, and is showing an interest in the club. He has one tech man in his employ.

Mr. Montgomery Hill, ’11, National Board members, was present and made a very inspiring talk, and offered his assistance in any way possible, which was duly appreciated.

On the attached sheet you will find a list of those present; also, now that we have organized, we will appreciate your sending us a charter.

We are all back of Tech in everything and if at any future time there is anything that we can do, don’t hesitate to call on “The Memphis Georgia Tech Club”.

Yours very truly,

J. F. McLendon,
Secy. and Treasurer.

Congratulations, Memphis Alumni, every success to you.

Charter has been forwarded and we hope that other cities will follow your example without delay.

Conferring of Degrees, Certificates, and Com-
missions in the R. O. T. C. ............................... Dr. Marion Luther Brittain
President, Georgia School of Technology.
Closing Address to Graduates ......................... Hon. Nat E. Harris
Chairman of the Board of Trustees.

SHIP'S BRIDGE ON CAMPUS—STUDENTS
TO TAKE SUMMER CRUISE

The Tech Naval Unit has a ship's bridge on the campus.
It is mounted on a circular cement base in front of the
control building. The bridge is triangular in shape, and
is revolved by means of a regular steering wheel mounted
at the back of the bridge. A real ship's compass is mounted
in front of the steering wheel by means of a binnacle.

Two engine room annunciators are also mounted on the
bridge. These are used to give orders to the engine room,
regarding speed: Going ahead, stopping, and backing at
various speeds. Mounted on the forward end of the
bridge is a pelorus, which is a dumb compass and is used
only for taking bearings of the ship by land-marks, or by
position of the sun, etc. This instrument is used in plotting
the position of the ship on a chart. The apparatus
was made by "Uncle Heiny", up in the woodshop, and
will be used to instruct and train the navy boys in steer-
ing a ship by means of a compass.

Short cruises on modern battleships are planned this
summer as part of the theoretical training for college stu-
dents enrolled in the naval reserve officers training corps.

The navy department announces that the recently
modernized battleship Florida had been designated as the training
ship for the cruise on the Atlantic while the battleship
Tennessee will serve a similar purpose on the Pacific.

Football Ticket Letter to Go Out August 10

The Alumni Association wishes to call attention particularly to the last paragraph in the letter above. The members of classes which have graduated within the last few years will be assigned seats which are not as well placed as the alumni concerned might wish, as is to be expected considering the fact that the older classes are to have first choice. Those alumni who are not satisfied with their seats are advised to look over the selection of seats at Jacob's Pharmacy on September 1st. If you find seats there which suit you better than those which were assigned you by the Athletic Association, buy them. The Athletic Association will return your money with prompt presentation of the undesirable tickets at its office on the campus.

Ticket Allotments
Sections C, D, E, F, G, H, I and Y of the West Stand and Sections D, E, F and G of the East Stand are to be allotted for season ticket sales.

Sections A, B and X of West Stand and Sections A, B, C and X of East Stand are apportioned to students, and team supporters of Alabama, Vanderbilt, Georgia and Auburn.

Sections H, I and Y in East Stand are for the Tech student body.

From the foregoing it is obvious that centrally located seats cannot be obtained for single games. Only Sections J, K and Z of West Stand and Sections J, K, L, M and Z of East Stands are available for the major individual games. Seats on the curve of South Stand are more desirable than seats in L or M of East Stand, although it can hardly be stated that there is really a poor seat in the entire stadium.

It stands to reason that if you buy a season ticket you have the privilege of disposing of the ones, at their cost price, that you're unable to use; such tickets would certainly be more desirable than those that later go on sale. Unexpected out-of-town alumni requests and similar conditions are met with uncalled for reservations and tickets returned from visiting team allotments; this, however, can't always hold true. So far as the records show, no Georgia Tech alumni has ever failed to obtain a seat on Grant Field to any event and this it is hoped will always be the case.

Kindly bear in mind that orders come in very fast at the beginning of the season and even though your order for individual games is sent in before September 1 you may necessarily receive South Stand tickets.
PROMINENT PROMOTIONS

The April issue of the Locomotive, which is published by the Hartford Steam Boiler Inspection & Insurance Co., carries the announcement of the election of Sherwood F. Jeter, B. S. in M. E., 1893, to a vice presidency in the company, and has the following to say on the subject:

"Sherwood F. Jeter came to the Company as an inspector in 1893. He advanced through positions of increasing responsibility in the Inspection Department and in 1915 was appointed chief engineer. As vice-president he will have full charge of the Engineering and Inspection Departments of the Company. Mr. Jeter graduated from the Georgia School of Technology in 1893. He is a member of the American Society of Mechanical Engineers and has been a manager and vice-president of that Society. He has continuously served on its Boiler Code Committee since 1913 and has had an important influence in establishing its standards of safe boiler construction now recognized throughout the country. Mr. Jeter is a past president of the Hartford Engineers Club and a member of several other technical associations."

It is also of great interest to know that Mr. William E. Wood, E. E., '07, is now President of the Virginia Electric and Power Co., Richmond, Va., one of the largest of its kind in the country.

Mr. Jack Holtzclaw, E. E., '07, is Vice-President of the Gulf States Utilities Co., Beaumont, Texas, another very large organization.

Mr. Geo. T. Marchmont, E. E., '07, was recently transferred to Atlanta and made District Manager of the Graybar Electric Company, formerly Western Electric Co., electrical supply division.

The following clipping from the Junior Chamber of Commerce Bulletin of Oklahoma City, Okla., was sent in by Charles E. Young, Jr., B. S. in E. E., 1921, who is managing the Monson Hotel in St. Augustine, Fla. It concerns S. S. Wallace, Jr., B. S. in E. E., 1920.

"S. S. 'Blue' Wallace comes from the Solid South, but despite that he's a fast worker. 'Blue' is one of the Directors of the Junior Chamber of Commerce and one of its most active workers."

"It took Wallace just eighteen months to go from a position on the street to advertising manager of The Oklahoma News, which position he now holds."

Mr. Jim Davenport, M. E. and E. E., '08, in addition to holding down his high position with the New York Central Railroad Co., was practically unanimously elected President of the International Railway Fuel Association at its convention in Chicago during the week of May 9-14.

GOLFERS WIN S. I. C. CHAMPIONSHIP

Watts Gunn, Tech's internationally famous amateur golfer, who has won more honors on the golf course than he remembers, and who was a member of the team which invaded England in search of the Walker Cup, will go to the National Intercollegiate Golf Tournament to be held in Garden City on June 28.

In the Southern Intercollegiate Meet held not long ago at Athens Gunn led his charges to the championship in competition with golfers from colleges all over the South. Alabama who has held the crown for the past year put up a strong fight before she relinquished the honor, and the Tech golfers brought away a wholesome respect for the Tide putters. Gunn also won the individual championship.

In the match with Georgia held early in May the Tech golfers won the meet 16 to 2 in an easy but brilliant match. The Tech golfers won every match except one which was a tie.

MR. AND MRS. REID WEDDELL

Mr. and Mrs. Reid Weddell, 909 Elmwood Avenue, Evanston, Ill., announce the arrival of a son, James Blount Weddell, on April 29.

Mr. Weddell is a member of the class of 1914 and is now with the Western Electric Co., in Chicago.

Mr. and Mrs. A. P. Francis, also of Chicago, have a new daughter, who is now about four months old.

Mr. Francis, M. E., 1915, is the manager of the Chicago office of the Miller Mfg. Co.
MR. GEO. S. HARRIS HEADS AMERICAN COTTON ASSOCIATION

George S. Harris, class of 1901, was elected president of the American Cotton Manufacturers' Association at the convention in Atlantic City, N. J., on May 14.

Other officers selected at the time were: H. R. Fitzgerald, of Danville, Va., first vice-president; Arthur M. Dixon, North Carolina, second vice president; W. W. McLaurn, of Charlotte, N. C., secretary.

An important feature of the convention were the steps taken to effect better cooperation between manufacturer and producer on one hand and manufacturer and employee on the other. Resolution expressed approval of the "splendid spirit of cooperation manifested by the employees of the textile industries in the south," and "for the good sense and sound judgment of our native Anglo-Saxon help" in "persistently refusing to yield to radical leadership or the whisperings of would-be reformers."

TANK TEAM ELECT HOLLEMAN CAPTAIN

Red Holleman was elected captain of the 1928 Tech swimming team at a recent meeting. Dave Young, national intercollegiate back-stroke champion and holder of the intercollegiate as well as the world's record, was elected alternate captain. Billy Wardlaw was elected manager with Dick McKinstry as assistant.

The Jackets have closed out a very successful season, making a splendid showing against both the strong Central Y. M. C. A. team of Brooklyn, N. Y., and Yale University, national intercollegiate swimming champions. The Jackets defeated the University of Florida in a dual meet which at first was to have been a quadrangle affair with Vanderbilt and Georgia as well as Florida opposing the Jackets. Vandy and Georgia failed to muster teams this year and dropped out of the running for the southern title. Tech also defeated the Citadel, taking every first place and most of the seconds in the dual meet held at Charleston.

FRESHMAN NINE HAS BIG SEASON

Tech Frosh Baseball players under the tutelage of Coach Roy Mundorff had a most successful season, winning 14 out of 16 games.

Among the teams they met and defeated were Georgia Frosh, Auburn Frosh, Monroe A. & M., Georgia Power Co., and several strong high school teams.

The following were selected by Coach Mundorff to be awarded numerals: Hecke, Hobbs, Minell, Terrill, Frink, Hutchison, Campbell, Myers, Spear, Tillman, Bayly, DeVaughn, and Jones.

WEDDINGS AND ENGAGEMENTS

Anderson-Brown

Mrs. Floyd Archer Anderson announces the engagement of her daughter, Elsie, to Mr. Charles Manley Brown, B. S. in Chem. 1925, the marriage to be solemnized in June.

Bickerstaff-Scales

An announcement of cordial interest is made by Mrs. A. H. Smith, of Atlanta, Ga., of the marriage of her daughter, Mrs. Helen Bickerstaff, to Mr. James B. Scales, class of 1911, in Asheville, N. C., on May 6.

Lochridge-Jones

Mr. and Mrs. Fuzzy Woodruff announce the engagement of their daughter, Dorothy Sue Lochridge, to Mr. Sam P. Jones, class of 1919, the marriage to be solemnized on Thursday, June 9, in Atlanta.

Moore-Conoley

Cordial interest is felt in the announcement of the engagement of Miss Grace Moore, daughter of Mr. and Mrs. Harry Thomas Moore, to Mr. John James Conoley, B. S. in E. E., 1920.

Lupton Residence Casements

R. D. Cole, III, Atlanta Manager
Track Team Has Fine Year---Hamm Elected Captain

Ed Hamm of Lonoke, Arkansas, who jumped 24 feet, 11 and 3-4 inches at the S. I. C. meet to establish a world’s collegiate record, was elected to captain the 1928 track team and Ernest Kontz was elected alternate.

Hamm blazed the trail this last season by hanging up a Tech broad jump record and a Southern and Georgia distance mark. In the Penn Relays he won the broad jump against the foremost athletes of the East and South. Besides being a jumper, Hamm is a star sprinter having won the 100 yard dash in every meet this season as well as starring in the 220. This was his first season on the varsity, and his record has been a brilliant one.

Hamm is to represent Tech with two of his teammates in the National Intercolligate in Chicago on June 10 and 11.

Ernest Kontz, the alternate captain for next year has been the Jacket leader during the past season and is the first Junior to have been elected to this office.

The Jacket track men carried off big honors in the state track meet held at Emory University. They checked off 87 points against 40 1-2 for Georgia, 34 1-2 for Emory, and 2 for Oglethorpe. Papa Hood, Ernest Kontz, Tom Wright, Dick Pickett, Ed Hamm, and the relay team composed of Hamm, Beall, Cabaniss, and Kontz all chalked up new marks to be shot at next year. Tech now holds eight of the fifteen records in the meet.

In the meet at L. S. U. for the S. I. C. championship, Tech emerged one point behind the victor, L. S. U. The score was 45 to 44 between Tech and L. S. U. Mississippi A. & M. was third with 32 points.
BASEBALL SUMMARY

Arthur McCash of Atlanta is to captain the baseball team next spring. His splendid playing in the outfield and his heavy hitting made him a logical man for the place. Out of 77 trips to the plate he got 58 hits for a percentage of .756. He knocked three home runs during the season.

To finish the season Tech met and defeated North Carolina in a two game series, and then repeated the operation in another two game series with North Carolina State. The climax to the season, though not as brilliant as last year, came with the series with the University of Georgia in Athens in which Tech won the first game 10 to 5 and dropped the second 10 to 8. Tech won 28 games and lost 11 to finish with a percentage of .681. She piled up 191 runs against her opponents’ 154.

Tom Angley led the batting averages with .413, Hugh Gaston was next with .388, and Bob Parham was third with .366.

Gaston pitched five victories in nine games to lead the pitching staff, and Izy Conn pitched five winning games and four losing games out of eleven. Gaston will be back with another season left to war with the Jackets, while Izy Conn and Earl Chaisson will graduate. Julian Carney and Lefty Hill will also be back another year.

Angley who has been one of the best hitters in the Conference has played his last baseball for Tech and will be sorely missed next year. Bob Moreland, John Brewer, and Sol Yeoman will also be lost to the Jackets next year.

Letter men for the season:

Student Managers: Stanley McCown, Thomason, Ga.; and Luke Tate, Tate, Ga.

Order Class Ring for Your Graduating Year

Only graduates and men of senior standing eligible.

Alumni Secretary approves each order before it is filled.

GEORGIA TECH ALUMNUS

Volume V

GEORGIA TECH'S WAR RECORD

As announced in the March issue of the Alumni, the Georgia Tech Alumni Association has undertaken to compile and publish as a complete history as possible of the activities of the Georgia Tech alumni during the World War.

The War Record is being compiled in part from information secured by Dr. G. H. Boggs, head of the Department of Chemistry, just after the close of the War. Additional material is sought each month in the Alumni through the publication of a blank which is to be filled out by all former Georgia Tech men who have not furnished this office with a complete account of their war activities. The blank will be found at the end of the War Record in this magazine.

The list of the Tech men about whom we have the desired information will be published in alphabetical order from month to month until the roll is complete. The War Record will probably be published in book form upon its final compilation.

It is requested that all alumni who know of Tech men who were killed in the War send in whatever information they happen to know on them, since it is practically impossible for the Secretary's office to obtain the necessary material in the majority of such cases except through the aid of the alumni.

It must be remembered that the only source of information which the Alumni Association has is the file of questionnaires filled out by the men concerned. In many cases the information given is evidently incomplete. Wherever there is an incomplete account given, or wherever actual mistakes have been made, it is requested that anyone in a position to send in a correction do so in order that the error may be rectified in later issues and in the projected book form of the record.

The following abbreviations are used in the record below:
add. present address; C. A. C., Coast Artillery Corps; C. O., commanding officer; cpl., corporal; c. c., civilian service; d., died; F. A., Field Artillery; J. E., junior grade; o. s., overseas service; Pvt., private; Sgt., sergeant; tr., training.

Corrections
Each month, as corrections on material in this department previously published are received, they will be listed under this head.

(Continued from last issue)

INDIANA LIMESTONE—THE NATION'S BUILDING STONE

GEORGIA 'TECH'S FUTURE BUILDINGS

How will they compare with those of other institutions? Write for illustrated brochure showing fine examples of college architecture in Indiana Limestone

OXFORD, Cambridge, and other venerable institutions of learning in Europe are built of natural stone. College building in this country has followed the European tradition. Limestone, the natural stone of which many of Europe's fine cathedrals and university buildings are constructed, is in this country likewise the building stone most used. The vast deposit of calcite limestone of which most of the finest stone buildings in the country are constructed is found only in two counties of southern Indiana.

Owing to the extent and central location of our quarries, this ideal building material may be delivered anywhere at prices which compare favorably with those of any other natural stone and frequently with those of substitutes.

Examples of fine college architecture in Indiana Limestone are shown in a brochure which we will gladly send you. This booklet may serve to widen your acquaintance with the best in college building and to enable you to follow more intelligently your institution's building program.

For convenience, fill in your name and address below, tear out and mail to Box 817, Service Bureau, Indiana Limestone Company, Bedford, Indiana.

The Alumni "signs off" until September. The Alumni Office will be open all summer, however, so call by during your vacation.

ENGINEERS!

Do you know that a corrugated culvert in a fill carries only one-third as much load as a culvert of the rigid type?

Write us for free report of American Railway Associations on the Farina Tests.

Tree Wire

With Foreword by W. K. Vanderpoel recognized authority on outside plant con-
struction, formerly General Superintendent of Distribution, Public Service Electric & Gas Company, (New Jersey),—now Vice President and Executive Engineer, The Okonite Company.

This little book will help you solve many a line construction problem. It is fully illustrated and presents the results of many years study of prac-
tical plant conditions regarding use of Tree Wire together with extensive field observations.

A Book to read—file—and use. Send for it TODAY.

Thirst and a taste for Coca-Cola are the same thing

How Taste Satisfies Thirst

Thirst, a natural call for moisture, is first registered in the palate. The sense of taste there was created to tempt you to take what's good for you even when it is good for you. Because, otherwise, you would not drink enough to keep the moisture in you up to the health-level. The palate, holding recollection of flavors, never forgets what has especially delighted it. Coca-Cola has so definitely pleased the public that thirst and a taste for it are the same thing.
