ENTERED AS SECOND CLASS MATTER MAR. 22, 1923, AT THE POSTOFFICE AT ATLANTA, GA. UNDER ACT OF MAR. 3, 1879
Competent Service – Confident Owners

Just a quarter of a century ago four young men, with a broad background of training and experience in the engineering construction field, formed The Foundation Company. Today the company is at work in every continent, in both hemispheres, and on both sides of the Equator, on engineering construction of almost every known type.

In order to successfully meet the unusual engineering problems presented, it has been the policy of The Foundation Company since its inception to retain a personnel highly specialized and efficient, with initiative and judgment. Over one hundred and fifty men with over ten years service with the company, are now on the rolls; a great factor in inspiring repetition of contracts.

As indicative of the service rendered by The Foundation Company over this period of years, these partial lists of repeat contracts have special significance. In one case no less than thirty contracts have been awarded by one owner.

LEGISLATURE INCREASES EDUCATIONAL APPROPRIATIONS

For a long period of years, Georgia Tech and other educational institutions of the State have struggled to hold their own on appropriations that were an increase over the widow's mite. Governing bodies of the past have been favorably inclined to vote necessary maintenance funds, but they were unable, somehow, to find any additional source of revenue; so when a legislative body finally surmounts all difficulties and proceeds in a just and business-like manner to create an increased income and then appropriates the anticipated amounts in a fair and substantial way — well, we can but hasten to add our grateful appreciation to that of others.

Georgia Tech was voted a yearly increase of $100,000 over its present appropriation, the sum to be applied principally to maintenance and, further, to needed extensions should a saving accrue. The sum of $75,000.00 was also provided for the purchase of all Government machinery now on the campus; this represents but a small portion of the value of the equipment and is a great asset to the institution.

We wish to tender a recent editorial in the Atlanta Journal which we quote, in part:

"In support of public education this legislature proved itself liberal beyond precedent. Not only did it take care of deficits to the amount of a quarter of a million dollars incurred by certain educational institutions, thus giving them a clean sheet which it is to be hoped they hereafter will maintain, it also granted large increases both for the common schools and for the university system. For the former it provided, in addition to the five millions usually appropriated, the sum of one million dollars as an equalization fund for the benefit of the less fortunate counties. To the institutions of higher learning it allotted more than seven hundred thousand dollars over and above their present appropriations, the University receiving one hundred thousand additional; The Georgia Tech one hundred thousand additional, and the State College of Agriculture an increase of fifty thousand in regular maintenance of fifty thousand in the Smith-Lever fund, and of twenty-six thousand in the extension fund. If there be those who can find no merit in legislative acts that kindle higher the beacons of free education and send their quickening light into the poorest country-sides, that the boy and girl on the loneliest farm may have a chance, The Journal again must beg to differ emphatically.

In the face of all that it did for humanity and for education, the legislature still stood firm against excessive taxes. Determined that the state should not be loaded with levies which would hamper enterprise, drive away investment and endanger the people's mounting prosperity, it exerted to the utmost its every power of patient and resourceful thinking to solve the problem of finance — and especially was this true of the senate. Thus it met the need of more revenue by moderate increases in the general tax act, by economies of administration, by savings here and there, without basing it on any rank and file or hazarding the continued growth of productive industry. Whatever discrepancy, if any, there may be between appropriations and assured income is more than offset by the certainty of increased property values and quickened business development which these wise and liberal policies guarantee."

COVER CHANGES It may take some time but The Alumnus hopes eventually to please all of the Georgia Tech alumni. With this in mind, the cover has undergone a few changes; so has the page content and make-up, to a certain extent. If any of you have any suggestions or constructive criticisms to make, please let us have the benefit of your ideas.

The Association of Alumni Secretaries have agreed upon
certain dimensions, as a rule, and we are complying with the accepted standards in this respect. Colored covers are not generally used, although some of the magazines that publish on alternate months, do go out for more display than others, to a good advantage, it's true, particularly on certain.

We have no college subsidy and while we show progress and a steady increase in circulation, a big improvement could be made with additional external help, such as the majority enjoy for the support of their respective alumni associations, publications, and services in alumni work alone. Georgia Tech's attitude is very favorable, in this connection, and the college has always co-operated in a very material way with the efforts of the alumni office and The Georgia Tech Alumnus. Until the present, the institution has had a job to take care of its immediate affairs but with better days ahead it is quite probable that the National Alumni Association may look forward to bigger and better things for its part in the extension work at Georgia Tech.

**PATRONIZE YOUR FRIENDS**

It has been a source of great satisfaction to know that our alumni have been giving a big volume of their business to our advertisers and other friends who have co-operated with us and the Georgia School of Technology. We know that you intend to keep up the good work and we feel confident that our supporters will always have your good will and a fine share of your business.

As you turn the pages of the Alumnus be sure to remember your friends whose help has warranted the publication of some 4500 copies of each issue of the publication throughout the scholastic year. A word only is sufficient, for we have every assurance that you do your part.

**ATTENTION ALUMNI**

In line with the foregoing, it is great to know that the Atlanta Alumni, in particular, are checking in to a man almost as active members of the Alumni Association. The out of town members, however, are not showing up as well as they should, although there are those who do not fail us, year in and year out. Those of you concerned can remedy that situation, we know: how about coming through strong when the regular statements reach you sometime in September? We are counting on all of you, in Atlanta and outside of the city; your support is needed if you want to continue your progress and insure advancement. JOIN UP, EVERYBODY.

**HOMECOMING AND GEORGIA DECEMBER 3.**

Begin making your plans now for one of the largest of the many Home Coming gatherings, to be held on December 3, and the biggest and hardest Georgia game of 'em all. Further announcements will be carried in the October issue, but you are especially urged to make your football ticket reservations immediately, if you have not already done so.

Arrangements will again be made with the various railroads to give special rates to the major contests, so, it would be to the advantage of those of you living outside of Atlanta to inquire at your local ticket office for any reduced fares that may be effective at the time you intend to come to the games.

**FOOTBALL TICKET NOTICE**

If you have received your SEASON tickets and have found that your class allotments have necessarily placed you farther than expected from your preferred sections, the Athletic Association advises that in all probability you may exchange for a more central location in the East Side Line Stands. Communicate with the Association at once in this connection, if interested, as the TICKET SALE HAS BEEN GREATER THIS YEAR THAN EVER BEFORE!

We are informed that no Georgia Tech alumnus has failed at any time to get a seat to any of the games and it is hoped that this will always be the case, yet, don't depend upon that fact. Consequently, try to anticipate your needs for the individual games, as well, in order to provide yourselves with the best available reservations.

 Provision will be made as usual for the last minute requests of the out-of-town alumni, in particular, although it is very much desired that you give every consideration to the statements in the foregoing paragraph.

Recent Improvements and Extensions

The work of the Georgia School of Technology during the last biennium has been marked by success and even distinction. During this period the United States naval authorities selected the school as one of six in the entire country to give the naval R. O. T. C. instruction, heretofore confined to Annapolis. According to official information, the chief reason for selecting Georgia Tech was its high standard of instruction, particularly in science and mathematics.

The physical plant of the school has undergone certain improvements and extensions. The Ceramicus Building has been completed and equipped with money provided jointly by the Greater Tech Fund and the ceramic industries of the state. Emerson Laboratory, Julius Brown Memorial Dormitory, and N. E. Harris Dormitory have been built with money provided by alumni and friends of the school.

It is a source of regret that not a single one of these permanent improvements, so essential to the welfare of the school comes from the state treasury. They are the gifts of liberal friends of the institution. This faith and devotion mark Georgia Tech graduates and friends throughout the land. The South's strongest and most influential

Technical Training and Southern Industries

In a recent issue of the Manufacturer's Record, devoted to the industrial development of the South, there appeared an analysis of conditions, past and present, that is of vital interest to every thoughtful Georgian. In this article it is pointed out that the first stage of industry in the South consisted solely in the reckless exploitation of unsurpassed natural resources, with no attempt to manufacture finished products.

The succeeding stage might well be called the era of the amateur manufacturer. During this period many men found it possible to leave other professions and, although lacking experience and training, make a financial success in manufacturing simple products as pig iron, or coarse cotton goods. Increasing competition and rapid economic changes in recent years have caused these amateur manufacturers to either fail, or re-adjust themselves to changed conditions.

The present stage of Southern industry is the age of technical training—the application of science to manufacturing. Practically every industry in Georgia is now undergoing re-organization on the basis of improved methods, expert management, and increased technical skill. To succeed under modern conditions any branch of industry must have its quota of men with suitable technical training.

Georgia Tech has produced and is producing such men, but not to the extent warranted by the industrial possibilities of the state. As the nationally known writer, Lawrence Perry, has said, Georgia Tech men are building roads and bridges—Atlanta's finest viaduct, for instance—and are at the head of industrial progress throughout the state and South, but there are not enough of them.

General Wood and Teammate

McDaniel Answer Last Call

Georgia Tech joins the entire nation in mourning the death of one of her illustrious alumni, Major General Leonard Wood. This man whose record in public and military life is well known attended Georgia Tech in the early nineties and played on the first Georgia Tech football team.

A striking coincidence was the death six days later of Homer L. McDaniel of Atlanta, who was a teammate of General Wood on the first Tornado. Mr. McDaniel was stricken on the streets of the city and died a few minutes later.
Tech Men Leaders in Textile Body

At the meeting of the textile operating executives held at the Henry Grady Hotel in Atlanta on September 13 it was interesting to note that four of the members of the governing board of the organization are graduates of the Georgia School of Technology.

Frank S. Dennis, manager of the Consolidated Textile Corporation, Lafayette, is vice general chairman. He graduated in Textile Engineering in 1917.

Frank L. Asbury, B. S. in T. E., '21, superintendent of the Hillside Cotton Mills of LaGrange; R. J. Jennings, B. S. in T. E., '21, of the Lanett Mill at West Point; and Frank B. Williams, B. S. in T. E., '29, superintendent of the Fairfax Mill of West Point are all members of the executive committee.

These men are all prominently identified with textile work in the state and took an active part in the convention. The basis of discussion at the convention this year was the technical subject of warp preparation, covering the processes involved in treating the yarn prior to weaving.

Another Tech man, James Lee Young, of the class of 1927 in Textile Engineering was awarded the National Association of Cotton Manufacturers' medal in the competition this past year as a recognition of leadership in his profession. He with other winners of the medal from other institutions received prominent mention in the June 8 issue of Commerce and Finance.

ALUMNI PROMINENTLY MENTIONED

One of the unseen heroes of the moving picture "Chang" which was shown at the Howard during the past summer was a Georgia Tech man, Merian C. Cooper whose exploits were graphically described in The Alumnius about three years ago stood by the cameraman with a high powered rifle to keep wild beasts off while that individual ground out the film. The film was made in the jungles of Siam and the men were in constant danger. Cooper was an aviator in the world war and later became a member of Poland's defense against the bolsheviks in Russia.

Bobby Reeves who finished Tech in 1926 established a new American league record for assists when he made thirteen to aid the Nats in defeating Cleveland. The old record was twelve made by Kid Elberfeld of Detroit in 1901. The second inning of the game was the only one in which Bobby did not make at least one assist.

R F. Munsalvitage who finished Tech in engineering chemistry in 1913 has recently been stationed in Atlanta as an expert in the industrial organization of the Seaboard Airline railroad. He will devote his time to the industrial development of the states of Georgia and Alabama. Since leaving school he has held various positions which have given him unusual experience in research work.

Word has been received of the appointment of E. D. Treanor of the class of 1908 in electrical engineering to the position of acting manager of the Distributing Transformer Department of the General Electric Company at Schenectady. When this department was organized about a year ago Mr. Treanor was transferred to it as a design engineer, and recently was appointed to his present important position.

Georgia Tech Clubs Active

Southern Club Organizes in Chicago

Fifteen representatives of ten Southern Colleges met on August 10 in Chicago to form a temporary Association of Southern Colleges in Chicago, according to a letter from Mr. Warren Wheary, secretary of the Chicago Georgia Tech Club.

It is expected that the organization will be permanent in a short time. Headquarters will be at the Congress Hotel, and there will be kept a list of the names and addresses of all Southern alumni in Chicago.

Wheary reports that the Georgia Tech Club is progressing very nicely, with meetings every month with about fifteen present. During the month of August the club sponsored a golf tournament and a bridge tournament. At the next meeting of the club plans are to be made for attending the game at Notre Dame in a body.

Carrollton Alumni Organize

On June 27 the alumni of Carrollton, Georgia, organized a Georgia Tech Club affiliated with the National Alumni Association.

Officers elected for the ensuing year are F. M. Kimble, Jr., 1923, President; J. A. Aycock, 1923, Vice-President; and Alvin Vaughn, 1926, Secretary-Treasurer.

The club plans to interest the young men of that section who are ready for college in the possibilities which Georgia Tech has to offer and to advertise the school in every way possible.

Memphis Meeting

The Georgia Tech Club of Memphis, Ten., held a big meeting and dinner on September 1 at which they entertained the Memphis boys who are now attending Tech. Tech songs were sung and a general good time was had. The club plans to meet regularly during the year and be active in assisting the work of the National Association.
Tech Navy Cruises Atlantic

Tech's Navy, which was created last year in courses of the freshman class, took its first cruise on salt water during the past summer, putting into practice the naval knowledge that they learned in class under Commander London and his assistants at Tech and on the lake at Piedmont Park.

The boys had a good time on the trip and proved to be true sailors by not getting sea sick. During the cruise of the Atlantic the ship, the U.S.S. Florida, stopped at Annapolis where the boys had the opportunity of visiting the Naval Academy and seeing the midshipmen there in training, and again at New Haven where the Yale navy was picked up. They then sailed to Havana, Cuba, for a stop.

On board ship the boys had classes in navigation, seamanship, engineering, and ordnance. While they were at sea the boys were entertained by moving pictures and boxing matches. At Yale, the Tech unit was entertained by the Yale students at a tea dance, and were shown around the grounds.

In Cuba the reserves enjoyed themselves immensely, having quite extensive shore leaves. All of the members of the unit were thoroughly enthused over the Navy and desire to keep up the work until they are commissioned.

A blank data sheet was enclosed with your football application letter and mailed to each of you about the middle of August. The blanks requested your correct mailing addresses, business connections and similar information, and we trusted that all of them would have been returned to us by now so that we could publish your class as a supplement to the September 1928 Directory number of THE GEORGIA TECH ALUMNUS.

Those of you who have not already done so, are urged to fill in your data sheet and return it to the National Ga. Tech Alumni Association at once; otherwise we shall consider your home address as correct.
FOOTBALL PROSPECTS

The thrush of the pigeons is sounding on Grant Field again as the Tornado is preparing for its long hard season of ten games.

Prospects so far point to Peter Pund as the most likely candidate for center, with Rusk Law, a graduate of the frosch squad and John Lillard as rival contenders for this position. Lillard may be shifted to tackle, however. At guard there is Raleigh Drennon and Fitzo Martin together with Joe Kent, Frank Speer, Coot Watkins, and Joe Westbrook, making an exceptionally strong reserve force for this position.

At tackles Papa Hood, Kenneth Thrash, George O’Boer and Ben Sloan are candidates with Hood and Sloan leading the field.

The flanks will be well handled by Captain Ed Crowley and Glenn Holland in combination with Heek, Largen, Waddy, McCash and possibly Ralph Bullard.

Backfield material is plentiful, the problem of the coaches being to find the four that will work best together. Shorty Smith who broke his ankle last spring in football has been running and getting it limbered up for the season. Harry Eaten and George Sprick are two other prospective quarters. “Stumpy” Thomason, Bob Randolph, DeVaughn, and Jack Jetson form a promising group of line plungers. The pair of running backs will come from Bob Parham, Mizell, Oltz, Bob Horn, Ben Dempsey, Frick, Faison and Bo Reid. The two Bobs look mighty good together and the others also should come in for their share of glory.

EVENING SCHOOL OF APPLIED SCIENCE TO EXTEND WORK

The Evening School of Applied Science has recently proposed a plan to extend the work of the school and make its facilities available to the college men of Atlanta.

This plan should be very beneficial to undergraduates as well as graduates. Numbers of men find it necessary to drop out of school for a year or two in order to make money with which to finish their courses. Such men located in Atlanta should welcome the opportunity to take a subject or two each term at night and thus lighten their schedule when they return to day school. Probably some of the alumni would like to take some undergraduate courses in subjects different from those taken for their degree. An M. E. graduate might like to take more work in E. E. or vice versa, and then quite a few may desire to do graduate work. All those interested should express themselves and enroll to avail themselves of the present facilities for such work.

In order to put this plan in operation it will be necessary to know something of the demand. A letter has been mailed to all Atlanta alumni telling of the work and the plan, and all are urgently requested to send an immediate reply.

Volume II, No. 5, November 10, 1927

A number of Southern Events follow:

A number of Southern Events follow:

In the middle of the month the annual rice and corn harvest was in full swing. In the north the harvest of sweet potatoes was underway. In the south the harvest of tobacco was underway. In the north the harvest of apples was underway. In the south the harvest of oranges was underway. In the north the harvest of cherries was underway. In the south the harvest of peaches was underway.
CHANGES IN FOOTBALL RULES

A number of changes, some interesting to the fans and some not, were made by the football rules committee last winter.

In the first place the goal posts heretofore set in the middle of each goal line have been set back ten yards and are placed in the middle of each end line. In the main this means that instead of making the extra point after touchdown a short placement kick, it becomes more in the nature of a field goal. The ball is put in play on the three yard line for the extra point, and usually kick is made from a point ten to fifteen yards back of the line of scrimmage. With the extra ten yards it makes about thirty yards, and the extra point is harder to get.

The time under the new rule requiring players to come to a stop for one second after getting into their new positions from the shift or huddle can be conveniently measured by counting 1-2-3-4, the committee states.

Then there is the lateral pass.

Any player has always been free to pass the ball backward at any time, but if he receiver missed it was a free ball. The rule committee made only one change, and that was to make the ball dead instead of a free one on first, second and third down. If on the fourth down the distance has not been made the ball goes over.

There are several points to be explained, however. The rule reads, in part: “On any such pass (other than pass by the snapper back) on the first, second or third down, etc.” If the fullback is in punt formation, the center snaps the ball and the fullback misses, then the ball, when it strikes the ground, is a free one and not dead. If, however, the quarterback, in close formation, receives the ball from the center, and hands the ball back to the fullback, who drops it, the ball is then dead where it hit the ground and cannot be picked up for a run.

Under the rules headed “Delaying the Game” there has been a noteworthy change made. The rule reads, partly, “During the last two minutes of either half time shall not be taken out for substitutions made by the team in possession of the ball.” That does not prohibit EITHER team taking a regular time out to attend to an injured player but it does prohibit stalling.

BIRTHS

Mr. and Mrs. Homer Carter of Opelika, Ala., announce the birth of a son, Homer, Jr., on August 2. Mr. Carter graduated in electrical engineering in 1923.

A recent arrival in the home of Mr. and Mrs. C. A. LeBey was Naomi Quann LeBey, born July 25. Mr. LeBey was of the class of 1925, B. S. in E. E.

A son, Edwin Alexander, was born to Mr. and Mrs. Carey Liddell on June 27, 1927. Mr. Liddell graduated in Commerce in 1922.

Mr. and Mrs. R. Jack Thiesen announce the birth of a son, George Traylor, on August 18. Mr. Thiesen is of the class of 1916, having taken his degree in electrical engineering.

The Game Isn’t Over

until you’ve lived it again on post mortems! At the Atlanta Biltmore you will find plenty of kindred spirits who will agree with you . . . or disagree with you . . . as your mood desires. Because the Atlanta Biltmore is the choice of discriminating visitors. With its excellent service and appointments, which often cause guests to declare it the “finest hotel in the nation,” and its location but a few blocks from the Tech Stadium, it naturally becomes the football enthusiast’s rendezvous. You will have a more enjoyable visit if you live here, while in Atlanta.

Tech's National and International Champions

With the recent great wins of Bob Jones, Georgia Tech is holding her head high in the world of athletics. Four of her students and former students are national or international champs.

Bobby is the best known of her illustrious sons, and he has more titles to his credit than he can remember. His record which was recently enriched by his sensational performance at Minikahda in winning the national amateur golf championship for the third time in four years, reads one triumph after another. He won the open in 1925 and 1926; tied in 1925 and lost in a 36 hole play to Willie McFarlane. Won amateur in 1924, 1925, and 1927. Runner up in national amateur 1926. Won the British Open in 1926 and 1927, and topped it all off by smashing par and a galaxy of the world's best golfers for the 1928 American amateur crown.

By winning at Minikahda, Bobby equalled and surpassed the record of the late Walter J. Travis who won the championship in 1900, 1901, and 1903 but who did not get to be runner up the fourth time. Bobby still has another mark to shoot at in the record of Jerome D. Travers who won the title four successive times. Although Bob's general records have never been approached nor perhaps ever will be as has well been stated. Bobby is also the author of a book in conjunction with O. B. Keeeler, the world's greatest golf writer. The book is entitled "Down the Fairway," and is autobiographical, telling of Jones' golfing experience from the time he first put a stick in his hands. The book has proved to be one of the most popular books of its kind according to reports from the many booksellers.

Another champion in the world of golf, still an undergraduate at Tech, is Watts Gunn. He has the National Collegiate championship to his credit, and also the Southern Conference title. He has played in the British Open and in the Walker cup matches; and for about the third or fourth time, has won the Georgia state crown this summer by a victory over Harold Calloway on the Savannah Country Club course.

The captain of the 1928 track team, Ed Hamm, one of the most brilliant cinder path performers that has been in these parts holds the National Collegiate broad jump championship, Southern Inter-Collegiate broad jump championship and the Georgia state title. His hundred yard dash record at the Penn relays last spring was the equal of the record which won the dash, though Hamm was unable to enter the finals of this event.

And still another champion is a Tech undergraduate, Dave Young, who created a sensation at Iowa City last year in the national intercollege swimming meet when, by himself, he won for Tech fourth place in the meet. He set a new national Intercollege record in the 150-yard back stroke making the distance in 1 minute and 44 seconds. He holds also the Southern Intercollege record for the 150 yard back stroke and the 100 and 200 yard free style.

WEDDINGS AND ENGAGEMENTS

Guast-Howell

Of wide interest in the Southeast is the engagement announced by Mr. and Mrs. George Louis Castor, of Tampa, Fla., of their daughter, Jean Elizabeth, to Mr. Homer Augustus Howell, of Jacksonville, Fla., the marriage to be solemnized in Tampa on September 6. Mr. Howell is of the class of 1923, having taken his degree in civil engineering.

Felton-Ogram

An event of August 13 was the marriage of Miss Annie Rebecca Felton to Mr. Alfred Ogram of the class of 1922. Mr. and Mrs. Ogram live in Cartersville, Georgia where he is representing L. W. Robert and Company as resident engineer in charge of the mill and village extension for the American Textile Company.

Hall-Lovell

Mr. and Mrs. Lewis H. Holt, of Sandersville, Ga., announce the engagement of their daughter, Margaret, to Mr. Edward Francis Lovell, III, class of 1923, of Savannah.

Proctor-Newton

Of wide interest in Georgia and the Carolinas is the announcement by Mr. and Mrs. Robert Proctor of the engagement of their daughter, Emma McIntyre, to Mr. Ernest Dudley Newton, class of 1923, of Lancaster, S. C.

Sieber-Carswell

Mr. and Mrs. Harry M. Sieber, of Evanston, Illinois, formerly of Washington, D. C., announce the engagement of their daughter, Margaret Bagly, to Mr. John Wright Carswell, of Chicago and Atlanta. Mr. Carswell graduated from Tech in Electrical Engineering in 1924.

PRESIDENT PREPARES ILLITERACY MANUAL

Dr. Brittain, President of the Georgia School of Technology has prepared a manual for the use of the Georgia Iliteracy Commission. The booklet contains easy lessons in reading, writing and arithmetic. It is for the use of the commission in its work to reach those in the state who have not had the opportunity to secure an elementary school education. Dr. Brittain was formerly secretary of the commission and has been vitally interested in the problem of illiteracy in Georgia for a long time.

ATLANTIC LIFE INSURANCE COMPANY

RICHMOND, VIRGINIA

RESERVE LIFE INSURANCE

College education has been proved necessary to train the mind to meet the great problems of today and tomorrow. Being equipped in this way, a person's income is increased.

But it is one thing to train yourself to earn money and another to learn how to save it, and accumulate an estate.

The only safe way for a young man to create an estate immediately, is through Life Insurance.

Do this while you are young, as the deposits necessary are based on age of applicant.

The sooner you do it, the better the investment.

Only 3% of the American dollar is invested in Life Insurance, yet 85% of the value of all estates that are left at death come from Life Insurance.

Statistics also show that every one hundred (100) people that reach age 65, ninety-seven (97) are depending on some one for support.

To which class will you belong?

We will be pleased to talk this matter over with you and show you Atlantic advantages, whether you take a policy or not.

"Honestly, it's the best policy."

ARTHUR C. BEALL, General Agent

H. EWING DEAN, District Agent

As announced in the March issue of the Alumni, the Georgia Tech Alumni Association has undertaken to compile and publish as complete a history as possible of the activities of the Georgia Tech alumni during the World War.

The War Record is being compiled in part from information secured by Dr. G. H. Boggs, head of the Department of Chemistry, just after the close of the War. Additional material is sought each month in the Alumni through the publication of a blank which is to be filled out by all former Georgia Tech men who have not furnished this office with a complete account of their war activities. The blanks will be found at the end of the War Record data in this magazine. The list of the Tech men about whom we have the desired information will be published in alphabetical order from month to month until the roll is complete. The War Record will probably be published in book form upon its final compilation.

It is requested that all alumni who know of Tech men who were killed in the War send in whatever information they happen to know on them, since it is practically impossible for the Secretary's office to obtain the necessary information in the majority of such cases except through the aid of the alumni. It must be remembered that the only source of information which the Alumni Association has in the file of questionnaires filled out by the men concerned. In many cases the information given is evidently incomplete. Wherever there is an incomplete account, however; or actual mistakes have been made, it is requested that anyone in a position to send in a correction do so in order that the error may be rectified in later issues and in the projected book form of the record.

The following abbreviations are used in the record below: add., present address; C. A. C. Coast Artillery Corps; C. O., commanding officer; corp., corporate; c. s., civilian service; d., died; F. A., Field Artillery; j. g., junior grade; o. s., overseas service; pvt., private; sgt., sergeant; tr., training; T. S., officers training school; O. C., officers training corps; M. T. C., motor transport corps.

GEORGIA TECH ALUMNUS

Registrants and Graduates 1901

This is a continuation of the directory begun in the September 1924 issue which will contain the names of all the men who have ever registered at Georgia Tech as shown by the bulletins issued annually by the college since the founding of the institution.

The names published in this issue are those listed in the spring of 1927 as belonging to the Apprentice Class, which graduated in 1906.

Wherever the present address of a man in this list is known, it is given. An asterisk before the name indicates that the current address is not known, but that the address at the time of graduation is recorded. An independent verification of the address is necessary before it is published. Any corrections or omissions by the Georgia Tech Alumni Association in order that the records may be brought up to date. Corrections on either starred or unstarred names are requested in case of mistakes.

CLASS OF 1901, APPRENTICE CLASS OF 1897

Abel, W. O.—Atlanta, Ga.
Barnett, H. J. B. S. in M. E.—P. O. Box 747, Jacksonville, Fla.

Selling SERENITY
A man wants to sell you a serenity of mind—
one of the best possible possessions.
He offers to insure you a sufficient and effec-
tuating income in your later years.
He offers to create an estate for your family.
He offers to make sure that your business will not suffer through the death of a key executive.
He offers to be of great assistance to you in your relations with your employees.
Who is he? He is a John Hancock Agent. He does not create a need in you, he fills one. His commodity is future ma-
terial security, the basis of serenity of mind.
Ask him to come in.

Walter Powell
