Coming Home

Family Housing opens new apartments

January 1 signals the beginning of students moving into the new Georgia Tech Family Housing apartments on Tenth Street.

Named alphabetically, the seven buildings range in size from 29 apartments (B) to 153 apartments (A). Buildings A through G are scheduled to open on a building per building basis, starting with Building D and G (both two-bedroom buildings, Jan. 1) and then Building A (one-bedrooms) on Feb. 1.

The remainder of the buildings will continue their move-in availability as construction is completed spring semester.

Filled with amenities, including washers/dryers, microwave ovens, 109-channel cable television, high speed Internet connectivity plus electricity, water/sewage and phone service, the apartments also have resources other Atlanta apartments do not.

"There are just some things that you cannot create," said Maz Kosma, community director, Family Housing. "They are because they are."

"Location is one of those things," he continued. "Our new Family Housing apartments are on the Georgia Tech campus and that makes these apartments special to our students who are seeking community with others like themselves."

Students agree.

Ricardo Campbell (graduate student, Physics) and wife Lataunynia (undergraduate, Building Construction) moved out of the Callaway apartments when those apartments were demolished, making way for the new Family Housing. The Campbells are now back on campus.

"We decided to move back early," Ricardo said. "We had planned to move back at the end of our current lease, but there were a lot of issues."

"Campus living is more convenient," he said. "The convenience of having the school nearby and one bill [rent, utilities, etc.] versus three or four different bills is better."

When asked how they felt about moving back to the campus, Lataunynia replied, "[Family Housing] is a place where students with families' unique living situations are understood and our support systems are maximized."

"[It's like] coming home."

Family Housing is accepting applications for these apartments now at www.tenthandhome.gatech.edu.

It's your option

Options Classes for spring

Want to have fun, enrich your life, meet new people and learn something too?

Enroll in one of the more than 70 Student Center Options Classes offered each semester.

Divided into nine categories (Arts and Crafts, Career Services Workshops, Counseling Center Workshops, Finance, Dance, Language, Music, Personal Development and Recreation), Georgia Tech students, faculty and staff may enroll in the one-day-per-week classes, studying such topics as Portuguese for Beginners, Business Etiquette, Inline Skating 101, Portrait Painting and the list goes on and on.

"You can learn basic conversational skills in at least six different languages each term," said Cara Skeat, associate program director, Student Center.

For those with special events in their future that might include dancing, Options has those classes too.

"We offer 20 classes in ballroom, swing, break dancing and belly dancing," Skeat said.

Class sizes are dependent on the necessary teacher to student ratio. Prices are based on instructors’ fees.

Registration for spring classes begins Wednesday, Jan. 12, and may be completed on-line or in person at the Student Center Box Office.

For information on spring Options Classes, visit www.fun.gatech.edu/options.

"I never got to take art in high school” said Rachel Smith (freshman, Architecture) in the Student Center Craft Center. “I looked the Options Classes up on-line and I’m taking Photography or Pottery [Spring Semester]."

Associate Vice President
Auxiliary Services

Seeing the completion of a construction project is an exciting time. Watching the Family Housing apartments go from 50-year-old dwellings to modern, efficient living spaces but not now. As each graduate, we will have to assign the spaces that become vacant when students have available are those that are filled and the only rooms we have are those that have available. With the buildings finishing in phases, we can let students pick where they prefer to live, first floor for some, fourth floor for others and the one-bedroom building (A) up to seven floors.

Everybody has their preferences and we are happy we can accommodate in these early stages as the buildings are finished.

When all the apartments are filled and the only rooms we have available are those that become vacant when students graduate, we will have to assign spaces but not now. As each building goes on-line, we are letting students pick their apartments.

Here’s a chart on the size of the buildings.

<table>

Residence Hall renovation which includes carpeted bedrooms and an upgrade in the heating and air conditioning system that gives students thermostats in their rooms.

A total renovation, Folk opens in fall 2005 with all new carpet, paint and furniture.

In addition to new facilities, Auxiliary Services added a couple of services of note too.

Parking & Transportation introduced its new, easy-to-remember telephone numbers.

For Parking, call 5-PARK (7275).

For Transportation questions, call 5-RIDE (7433).

When confronted with a question, sometimes it is easier and more convenient to remember a word than a string of numbers.

Parking & Transportation agreed and added these numbers so that customers can contact its departments quicker.

Health Services’ on-line scheduling is a hit as well.

I am happy to report that Health Services recorded 25 percent more services in the first quarter this fiscal year (July, Aug., Sept.) from the previous quarter (April, May, June) and also showed a 15 percent decrease in patients failing to cancel appointments.

We attribute much of these statistics to students taking advantage of the quick, convenient on-line appointment scheduling at www.myappointment.health.gatech.edu.

So, you can go on-line to register for the Family Housing apartments and to schedule Health Services’ appointments and when you need to call, just remember 5-PARK; 5-RIDE!

"Georgia Tech, mark your calendars!"

January
- Family Housing welcomes students into its Tenth Street Building D and G apartments.
- Options Classes registration is Jan. 12 - Feb. 2 ($5 late fee assessed on registrations completed Jan. 31, Feb. 1, 2).
- Impact Scholarship application announcement on-line Friday, Jan. 21, at www.importantstuff.gatech.edu.

February
- Family Housing welcomes students into its Tenth Street Building A apartments.

March
- Remaining Family Housing apartment buildings complete and already for occupancy.

Your Money
Printing in the Commons

The Student Center Commons and the Office of Information Technology (OIT) teamed together to offer 24-hour copying services to students, faculty and staff.

Conveniently located in the Commons’ central hallway across from Einstein Bros., the Student Center Commons Copy Center provides self-service color ($0.69 per page) and black and white copies ($0.08 per page).

BuzzCard accessible, customers may also pay with credit cards (VISA and MasterCard).

An attendant is available Monday through Friday, 10 a.m. to 4 p.m., selling report covers, colored paper, envelopes and other copying items.

Report bindings and fax services can be purchased during the attendant hours.

For a price quotation, call 404-385-6467.

Alecia Waye (junior, Industrial Engineering) plans for spring semester as she looks at the January calendar.
Georgia Tech alumna joins Health Services

Go to a big test and no time to study for it? The idea is to pull an all-nighter, finish the daytime commitments, drink lots of caffeine and study into the wee hours of the morning.

Not necessarily a good idea, said Jennifer Fortner, M.D. (Health Services psychiatrist), who, like other students, did just that.

“Around two o’clock in the morning I thought I was having a heart attack,” Fortner said.

“It was one of the worst feelings I’ve ever had,” she added.

“I didn’t know it at the time but I was having a panic attack,” she said.

She attributes this episode to stress, one of the common problems she sees in college students.

“In general the type problems that college students bring are problems with depression, anxiety, and often getting stressed out due to the demands of their course work,” Fortner said.

Fortner avoided future panic attacks by evaluating her time and planning ahead.

“I don’t know if staying up all night and cramming for a test will help you perform any better,” she said. “Study for what you have time and get a good night’s sleep.”

Some Georgia Institute of Technology students might think Fortner is not in tune with the rigors of a school like Georgia Tech, but then those students would be wrong.

An aerospace engineer graduate of the Georgia Tech class of 1994, Fortner was part of the dual degree program between Oglethorpe University (Atlanta) and Georgia Tech.

“I was supposed to take three years of courses at Oglethorpe and then two at Tech,” Fortner said.

“But because of Advanced Placement (AP) classes I took in high school, I finished my requirements [at Oglethorpe] early and then came to Tech,” she said.

Career Change

With a brother already an aerospace engineer and a grandfather who had worked for the Air Force, Fortner thought her good skills in math and enjoyment of art would give her a good basis for an aerospace engineer career.

“Early in college I decided that aerospace engineering was where I wanted to go,” Fortner said.

“I did a summer internship at NASA (National Aeronautics and Space Administration), which I enjoyed, but I wasn’t as fulfilled as I hoped I would be. I really wanted to do something where I had more interaction with people and felt like I was giving back more,” she said.

Returning to Tech, Fortner added premed classes to her curriculum.

“When I decided to do premed also, it took me a little longer [than planned] and I finished at Tech after two and a half years,” she said.

Family Practice

After years of school and more to come, Fortner took a year between Tech and medical college, learning the business side of medicine working in an outpatient surgical facility in the business office.

“My practice was too easy,” Fortner said.

It was during her four years at the University of Miami Medical School that she decided on psychiatry.

“I had planned to be a family doctor but found I was really drawn to psychiatric patients,” Fortner said.

“I found them the most interesting people to talk to and I liked the fact that I had a lot more time to spend with them than if I was a family doctor. That’s what really drew me to psychiatry.”

Students

It was during her four-year residency at Wake Forest University Baptist Medical Center when she first worked with college students.

“I got to work at Wake Forest University in their Student Health Department for a year,” Fortner said.

“I really enjoyed that and I worked with a professor who had worked in Student Health for a significant period of time and he really enjoyed it too.”

“I liked it because the patients are well educated, intelligent and interested in getting help,” she added.

“Also I was meeting them obviously early in their lives and I felt like I had a better chance to make an impact on them.”

Georgia Tech

Fortner brings with her more than medical experience, especially for Georgia Tech students. When discussing the challenges of course studies and involvement she said, “I’ve been there; I know how it is.”

“Transitioning to college life can be challenging for some people,” she said.

“Students who have been the best and brightest in their [high school] classes can find their course work much more challenging.”

“Some find themselves going long days on Mondays (8 a.m.-6 p.m.), giving students options on psychiatry office hours.

“Some find themselves going long days on Mondays (8 a.m.-6 p.m.), giving students options on psychiatry office hours.

Downtime

The Buzz 3

A wife and mother, Fortner spends her downtime with her family. She also enjoys hiking, gardening and reading “all kinds of books.”

How does she analyze her day?

“I get a real sense of fulfillment in helping people.”

**David Prophitt MOVES.** The Buzz salutes David Prophitt (program coordinator, Community Services) for his work with the Georgia Tech MOVE Office (Mobilizing Opportunity for Volunteer Experience) and especially Georgia Tech’s Relay for Life program as he MOVES to the American Cancer Society to become the Relay for Life State Manager. See you back on campus in April at Georgia Tech’s Relay for Life, David! Pictured here with Sally Hammock (associate director, Student Center), David is wearing his CNBSeen commemorative sunglasses from the Student Center Commons Grand Opening.

**Extra! Read all about it!**

Don’t forget to look for the Impact Scholarship application on-line at www.ImportantStuff.gatech.edu, beginning Friday, Jan. 21. Auxiliary Services awards $3,000 scholarships to 10 students selected for making a positive Impact on the Georgia Tech community. The selection process is based on essays describing the Impact, letters of recommendation and an interview process for the finalists.

**The Buzz Contest Winners**

Jonathan Chiew (below, l-r), freshman, aerospace engineering; Ayan Kishore, junior, computer engineering; and Hitesh Kanwathirtha, junior, computer science, were the first three students to correctly answer The Buzz summer issue question, when BuzzCard on-line account management will be available.

Andrew Howard (senior, computer science), president, Resident Hall Association, looks through books, thinking how he might spend a $25 Barnes & Noble gift card. The first three Georgia Tech students to answer the following question correctly win a $25 Barnes & Noble gift card. Which new Family Housing buildings are opening first and what is the earliest date students are scheduled to move in to these apartments? E-mail your answer to melissa.moore@aux.gatech.edu.
