Obituary

Mollie N. EwtIon

Georgia Tech recently lost a member of its community when Mollie E. Newton, 21, passed away on Wednesday May 16. Mollie was a senior economics major who was scheduled to graduate in December of this year. She grew up in Peachtree City, just south of Atlanta, where she graduated from McIntosh High School. Mollie was returning from her job at the State Capitol when her car flipped over in one car accident on Georgia Highway 74 in Tyrone.

Mollie interned at the Capitol during last year's Georgia General Assembly and she was working for the Georgia Pharmacy Association performing research and lobbying for its bills in the legislature at the time of her death. She was a member of the Georgia Tech rowing team. Mollie also worked for the Georgia Tech athletics department as a Peer Leader in the Freshman experience program and was an active member of the Christian Campus Fellowship.

At home Mollie was a member of Providence Mennonite Church. While here, she enjoyed singing and performing mission work. She went on a number of church trips to Appalachia to build homes and facilities for the underprivileged.

Mollie is survived by her sisters Katie N. EwtIon of Peachtree City and Elizabeth Warfield of Birmingham, Alabama; her parents Mike and Katherine EwtIon; and her paternal grandparents Billy and Viola N. EwtIon of Dothan, Alabama.

In lieu of flowers, the family would like contributions to be made to the Georgia Tech crew endowment that honors deceased members of the Tech community. Donations can be sent to the Georgia Tech Foundation, 225 North Avenue N.W., Atlanta, GA 30332-0220.

Mollie's memory will be honored by the school in this fall's "When the Whistle Blows," a ceremony that honors deceased members of the Tech community.

The Technique hopes to properly honor the memory of members of the Tech community who pass away with obituaries.

Portch from page 1

in the University System.

H. Clough named GALILEO, the online statewide electonic library system of the USG and secured funding to speed capital construction projects at a number of state institutions.

Portch also appointed 23 presidents, including Tech's President Clough, who was Portch's first appointment.

Academically, Portch raised the average SAT scores of entering freshmen to 1021, which exceeds the national average, while lowering the number of students who need remedial classes and toughening admissions standards to require Georgia high school students to take more core classes like math and science.

He increased funding for research initiatives and helped land both Georgia Tech and the University of Georgia in the top twenty public universities in the nation according to U.S. News and World Report.

Despite these accomplishments, Portch has been criticized by some for trying to do too much too fast.

"People in the Chancellor's position are always a little bit controversial because they have to make decisions that affect 34 institutions that have different dimensions, desires, strategies, and strengths. Inevitably there are places where you can say 'I wish he'd done this,' or 'I wish he'd done that,' but overall, history will judge Stephen Portch very, very positively," Clough said.

"Georgia legislators and others have also been critical of Portch's semester conversion, which cost the state more money than was initially estimated. It also profoundly affected the way Tech and institutions of higher education around the state structure and operate themselves.

"One argument is whether that was positive or negative," Clough said.

"I don't have any particular difficulty with it. I have been at institutions that love semesters, and I have been at institutions that love quarters, and we have been at institutions that love both systems and there are great schools operating on both systems. You can do well in terms of learning and creating knowledge on both systems."

"History will judge Chancellor Portch very well. He made major changes to substantially improve the quality of education."

G. Wayne Clough

President

"It's an example of an institution riding rough-shod over history and preservation."

Boyd Coons

Atlanta Preservation Center
break, however, many members of the Tech community. It is focused on Tech's future and reputation both at home and abroad. "This is an exciting time for Georgia Tech. It has changed dramatically over the past 20 years, and I think that it will be changing dramatically over the next few years as well. We have a truly outstanding student body, and I am looking forward to having the chance to interact with a broad spectrum of students," Chameau said.

Cough expressed his confidence in Chameau's ability to develop new programs, work with students, and balance the issues of teaching and research that students sometimes see in conflict with one another. "You have someone who brings a level of administrative experience that is rare. From the student point of view, I think Dr. Chameau was always known as a great teacher—a person who had serious concerns about students," said Cough.

"Although it isn't obvious sometimes some of our undergraduate students, he is working a series of major initiatives to improve the undergraduate learning experience that is rare. From the student point of view, I think Dr. Chameau was always known as a great teacher—a person who had serious concerns about students," said Cough.
